Tech in Electrical and Electronics in Embedded Systems MIT, Manipal University May 2016 SKILLS Python (2 years), SQL. (1 year), NOSQL (1 year), R (2 years), Machine Learning (2 years) PUBLICATIONS Post-operative life expectancy in lung cancer patients The objective of the project was to build an efficient predictive model based on a predefined dataset to predict whether the patient survives or dies within one year of the operation. The dataset given has 17 variables: 12 nominal, 2 ordinal and 3 numerical. The target variable has value true if the patient dies within one year of the operation else false if he survives. Tool used: R <https://www.indeed.com/r/Hartej-Kathuria/04181c5962a4af19?isid=rex-download&ikw=download-top&co=IN> Predict the Happiness (Sentimental Analysis) The objective of this project was to build a binary classification model for the data provided by TripAdvisor consisting of a sample of hotel reviews provided by customers. The model built can be used by them to understand the hotels listed by them. Tool Used: R Predict Network attacks The objective of this project was to build a multi-class classification model to predict the type of attack for an internet network company in Japan which has been facing huge losses due to malicious server attacks. The train dataset has 18 numerical features and 23 categorical features. The target variable has three classes. Tool Used: Python ADDITIONAL INFORMATION TECHNICAL SKILLSET • Languages & Technologies: Python, R, SQL, NoSQL, Predictive Modelling, Market Basket Analysis, Sentimental Analysis, Clustering, Bash Scripting (Preliminary), Socket Programming, Java (Preliminary) • Tools: R Studio, Jupyter, GIT, Sublime, MATLAB, Linux, KVM, Virtual Box, Open VZ, Oracle SQL Developer, MySQL, MongoDB, Excel, {'entities': [(2246, 2573, 'Skills'), (1435, 1480, 'Email Address'), (875, 964, 'Skills'), (861, 865, 'Graduation Year'), (837, 856, 'College Name'), (773, 830, 'Degree'), (767, 771, 'Graduation Year'), (743, 762, 'College Name'), (714, 741, 'Degree'), (271, 280, 'Location'), (233, 252, 'Designation'), (96, 141, 'Email Address'), (53, 62, 'Location'), (38, 52, 'Companies worked at'), (16, 35, 'Designation'), (0, 15, 'Name')]]})

("Ijas Nizamuddin Associate Consultant - State Street Irinchayam B.O, Kerala - Email me on Indeed: [indeed.com/r/Ijas-Nizamuddin/6748d77f76f94eed](https://www.indeed.com/r/Ijas-Nizamuddin/6748d77f76f94eed) With close to 3 years of experience in IT industry, I have had excellent exposure to design, development and implementation of Client Server Applications in various domains such as Banking and Finance concepts. I have been involved in various software Development projects in Open System environment.

WORK EXPERIENCE Associate Consultant Oracle Corporation - June 2011 to Present State Street Global Advisors (SSgA) is the asset management business of State Street Corporation, one of the world's leading providers of financial services to institutional investors¹, with a heritage dating back over two centuries. Backed by the strength and stability of the State Street organization, SSgA makes continual investments in asset management and client service platform, resulting in a client-focused, solutions-driven orientation .BrokerViews is the application which list all the details about the counterparties who invest their securities in State Street. The details also include ratings given by Bloomberg. Responsibilities: Development, Testing and support. Software Used: Java, GWT Associate Consultant Oracle Corporation - Bangalore, Karnataka - May 2010 to June 2011 This project is actually a redesign of an existing client website. The client website was designed on Java Server Pages (JSP) and our aim was to change it into a more dynamic web page using Adobe Flex. At first we changed the home page screen of the client website. After the successful completion of that we incorporated flex in to the account section also. This data which is obtained from DataBase is taken by the flex using a remote procedure call and the data is shown to the user. With the use of Advanced Data Grids, Charts(including Bar and Pie Charts) the site increased the readability and understandability of the users who were previously using the pages on java server pages. This site developed by us won the IMC (Interactive Media Council)'s outstanding achievement award in Financial information. The judge evaluate website based on 5 criteria: Design, Content, Feature Functionality, Usability and Standard Compliance. Our website scored 475 out of a maximum of 500 points. . Responsibilities: Development, Testing and support. Software Used: Java, Adobe Flex <https://www.indeed.com/r/Ijas-Nizamuddin/6748d77f76f94eed?isid=rex-download&ikw=download-top&co=IN> <https://www.indeed.com/r/Ijas-Nizamuddin/6748d77f76f94eed?isid=rex-download&ikw=download-top&co=IN> Framework: Springs, MVC Associate Consultant Oracle Corporation - Bangalore, Karnataka - February 2010 to April 2010 Description: Development of Basel II Application, Basel II is the second of the Basel Accords, which are recommendations on banking laws and regulations issued by the Basel Committee on Banking Supervision. The purpose of Basel II, which was initially published in June 2004, is to create an international standard that banking regulators can use when creating regulations about how much capital banks need to put aside to guard against the types of financial and operational risks banks face. In practice, Basel II attempts to accomplish this by setting up rigorous risk and capital management requirements designed to ensure that a bank holds capital reserves appropriate to the risk the bank exposes itself to through its lending and investment practices. The New Accord includes several methodologies for determining a bank's risk-based capital requirements for credit, market and operational risk. For Risk Based Capital (RBC), Credit Usage (CU) and Stress Test (ST), the methodologies that will be used for repo style transactions are Simple VaR if the collateral is eligible. If the collateral is ineligible then the Wholesale loan approach will be utilized or the collateral will be reduced to zero in the Simple VaR. . Roles and Responsibilities: Development, Testing and support. Software Used: Oracle 9i

OTHER PROJECTS AND REAL TIME TRAINING: RTRM(Railway Ticketing System Through Mobile) A mobile based real time application with many exciting features like checking pnr status, train availability, trains between stations etc. This application was done in j2me and it uses weblogic as server and MSSQL as the database. Undergone a mandatory Training on Finance By Oracle Corporation

EDUCATION Birla Institute Of Technology - Pilani, Rajasthan 2011 Bachelor of Technology in Computer Science University College Of Engineering, University Of Kerala 2005 to 2009

WORK EXPERIENCE Senior Systems Engineer Infosys Limited - Bengaluru, Karnataka - January 2018 to Present

Environment SAPUI5 version 1.4 Description: Airbus SE is a European multinational corporation that designs, manufactures, and sells civil and military aeronautical products worldwide. Project Contribution: • Working on creating a custom Annotation Tool (AnnoQ) using a third party js library to annotate any 2D picture within a SAPUI5 application specifically designed to work on laptop and Desktop. • The custom tool can be called from any SAP or Non-SAP system to be used as a plug-in to annotate pictures across the Airbus SE application to be used across browsers like Chrome/Edge and IE and should be compatible with Windows 7, 8, 10. • Parts of a picture can be highlighted and marked and using this tool and can be saved for reference or future use. • Worked extensively on Fabric js and created various customized objects like Call out Box, Measurement Arrow, Datum, Cross Datum, Forward arrow, etc on mouse and object events. • Implemented various functionality like color change, crop, zoom, text size selection, width selection, saving the annotation in JSON format in the backend so as to retain the original picture as it is. • Also contributed in designing the layout and overall appearance of the tool. • Contributed in integrating the application with MNC Mobile Application. Senior Systems Engineer Infosys Limited - Bengaluru, Karnataka - October 2015 to Present • Having 2.5 years of experience in SAPUI5/Fiori, Netweaver Gateway Odata Services and SAP ABAP development of large scale ERP packages. • Working with SAP/R3, ECC environments also having experience in HTML, JavaScript, JSON, XML, CSS. <https://www.indeed.com/r/Lakshika-Neelakshi/27b31f359c52ef76?isid=rex-download&ikw=download-top&co=IN> <https://www.indeed.com/r/Lakshika-Neelakshi/27b31f359c52ef76?isid=rex-download&ikw=download-top&co=IN> • Currently working as Senior Systems Engineer with Infosys Limited, Bangalore since October 2015. SAP Expertise SAPUI5/Fiori • Expertise in developing SAP UI5 applications using ADT (Eclipse) /WebIDE, jQuery, JavaScript, HTML5 and CSS3. Also consuming the data by using Netweaver Gateway services. • Well equipped in extending and customizing various UI5 controls specially charts, vizframes and Smart Table, etc. • Experience in integrating Gateway Odata/JSON services with UI5 application. • Worked extensively with application having multiple Views and controllers and hence experienced in navigating through it using Routing using both XML and JS views. • Exposed to be working in SAPUI5 Custom Applications and Standard Fiori Applications. • Experienced with UI5 application development in local server and debug it in Chrome/Firefox debuggers. • Experienced in Github. Advance Business Application Programming • ALV (ABAP List Viewer) - Grid and List Display. • SAP smart forms and Scripts. • Worked in BDC (Batch Data Communication) - BI and CTU method • RFC Function Modules. • Exposure in creating Data Dictionary objects (Domain, Data Elements, Structures and Views) • Conceptual knowledge Dialog programs using Menu Painter/Screen Painter • Worked on Object Oriented Programming concepts (OOPS) Systems Engineer Infosys Limited - Bengaluru, Karnataka - August 2017 to December 2017 Environment SAPUI5 version 1.28 Description: Jabil Inc. is a US based global manufacturing services company headquartered in St. Petersburg, Florida. Jabil is involved in design engineering services. The company has industrial design services that concentrate on designing the look and feel of plastic and metal enclosures that house printed circuit board assemblies and systems. Project Contribution: • Created custom Fiori apps for the client including screens having functionality of create document, Inbox to store the transaction mail and Dashboards to view day to day transactions. • Prepared multiple screens for the dashboard with view reusability features. • Worked on OData binding and hence display of data in relevant format on to the screen. • Implemented various other functionalities based on OData consumption, Routing and Navigation and JSON models. • Worked on complex functionality like excel data transfer directly to UI5 tables on screen while keeping the table data editable and also excel data upload functions to the table. • Have clear and distinct knowledge of various UI5 controls. Systems Engineer Infosys Limited - Hyderabad, Telangana - 2016 to July 2017 Environment SAPUI5 version 1.5 Description: American Water is an American public utility company operating in the United States and Canada. It was founded in 1886 as the American Water Works & Guarantee Company. Project Contribution: • Worked as SAPUI5 developer in KPI project for American Water account. • Developed KPI Dashboards using controls like Vizframe, Tables etc. • Worked with different types Micro charts control available like Column, Comparison, Radial etc. • Also extended some of them as per project requirements. • Experience of working with OData to get the data to be displayed on the dashboards. • Additionally, implemented some special features in the Dashboard development like Export to excel link, Download Image of the UI charts & documentation link in Fiori tiles. • Also worked on multiple levels of drill downs using multiple controllers and views. • Individually worked and delivered an extension for one of the UI5 controls which got much appreciated from clients and offshore team as well. • Implementation of the apps on Fiori Launchpad. • Implemented multiple filters on the data pulled from the service for desired results as per project requirements. SAP UI5: UI5 Controls: • Created dashboards by various UI5 controls such as Tables, vizFrame, Tab Filters to name a few. • Exposure in extending various UI5 standard controls to get the desired result. • Used SAP best practices while using all these controls. Systems Engineer Infosys Limited - Hyderabad, Telangana - July 2016 to September 2016 Environment SAP 5.0 Description: Harley Davidson is an American motorcycle manufacturer, founded in Milwaukee, Wisconsin in 1903.

Project Contribution:

- Innovation track dashboard preparation.
- Creation of POC application to filter the list based upon multiple filters with the help of Dialog Programming.
- The application also had functionalities like add new POCs, update and delete the existing ones and modify others.
- Data Upload to the SAP system from Excel sheet using BDC.
- Additionally, the task required knowledge of Data Dictionary, Report Programming- Classical & ALV, Module Pool Programming, Batch Data Communication- Call Transaction & Session Method.

("Sai Patha Mule ESB Integration Developer - Cisco Systems Hyderabad, Telangana - Email me on Indeed: [indeed.com/r/Sai-Patha/981ba615ab108e29](https://www.indeed.com/r/Sai-Patha/981ba615ab108e29) • 6+ years of professional experience in end-to-end designing, developing and implementation of software solutions in the areas of Middleware Integration and J2EE based applications. • Expertise in the areas of Core Java, Servlet 2.3, JSP, Web Services, MESB, and OSB. • Expertise in PL SQL programming and Oracle Apps (Oracle Order management) • Having 2.5+ years of experience in Mule and expert in Mule ESB development (3.7v & 3.8v), Mule ESB administration and Mule API management (API GW 1.x, 2.x, 3.x) CloudHub. • Experience in building Mule ESB & API management platform for organizations • Experience in performance tuning, testing, and benchmarking the platform for the organization. • Expert in building middleware systems using Message Routing, Content Enrichment, Cache Mechanism, Message Filtering, Message Transformation, Message sequencing, Batch message processing, Error handling and reconciliation mechanisms. • Expertise in designing and implementing multi-tiered application with high performance using J2EE standards. • Good understanding of API management systems - Mulesoft and RAML. • Experience in compiling proof of concepts and presenting to customers. • Deep knowledge of all phases of software engineering involving analysis, design and implementation. • Hands on experience in load testing and performance testing and setting up the environment. • Very strong debugging skills. • Expertise in implementing different J2EE design patterns and Java Multi-Threading. • Hands on experience in creating Splunk dashboard, App for production proactive monitoring and for reporting. • Good understanding in Web services security. • Extensively worked on servers Apache Tomcat, JBoss, Web logic and WebSphere. • Familiar with reviewing Functional Requirements and writing Technical Specifications. • Extensive Expertise in using Oracle 11i. • Broad knowledge of version control systems, build scripts and logging mechanisms. • Analysis, design and development of Applications based on J2EE & allied technologies using Agile methodology. • Implementing high-end performance REST services for Middleware using Core Java. • Deploying Builds to DEV/TEST/PROD environment using Kintana, Udeploy & URelease tools. • Implementation of modules using Core Java APIs, Java collection, XML technologies and integrating the modules. • Responsible for converting the understood business into Technical Specification document. • Taking KT sessions from client on Application functionality and discuss with Business Analysts to integrate new functionalities with existing systems. • Utilize Oracle as back-end database and TOAD for querying. • Utilize Log4j as logging mechanism and developed wrapper class to configure the logs. • Utilize CVS, SVN, and GIT as Version control tool. <https://www.indeed.com/r/Sai-Patha/981ba615ab108e29?isid=rex-download&ikw=download->

top&co=IN • Used Maven build scripts to create and deploy the release builds. • Prepare the Functional and Technical Design documents. • Module implementation and customization based on the Change Requests. • Development and support for different releases before and after implementation of launch. • Review the fellow developers' code as an exercise of internal code review. • Carry out Configuration Management activities for projects. • Carry out Weekly Status reporting activities such as MOM updates and health sheet generation. • Excellent communication and interpersonal skills. Involved in client interactions for scoping, effort estimates and status reporting.

WORK EXPERIENCE

Mule ESB Integration Developer Cisco Systems - San Jose, CA - April 2017 to Present Project: Extended Enterprise B2B Transformation Responsibilities • Followed agile methodology and Scrum. • Involved in application design and participated in technical meetings, Effort estimations, backlog grooming, I&A etc. • Involved in analyzing, developing, troubleshooting, debugging, and optimizing ESB application. • Involved in documenting and presenting designed technical solutions. • Extensively used Anypoint studio to develop and design the business process. • Implemented complex transformation Logics using MEL • Building RESTful Web Services with Anypoint Platform for APIs • Involved in data transformation and mapping using data weave • Tested the business process in test mode for debugging • Build and deployed using Anypoint studio, maven. • Participating in meeting and on-calls • Code reviews and independent unit testing for components • Manage code release deployment into development, SIT, OAT and production • Error handling is properly done in all the business processes Technologies: Mule Server 3.7 EE, Anypoint studio 5.4, cloud hub, Maven, core java, GIT, RAML, APIKit, SOAP UI, Postman, Agile, Jenkins.

Mule Soft Team Lead Cisco Systems - San Jose, CA - June 2016 to March 2017 Project:FSMS Responsibilities: • Followed agile methodology and Scrum. • Involved in application design and participated in technical meetings, Effort estimations, backlog grooming, I&A etc. • Gather requirements and planning on integration of oracle data base with cloud applications using Mule ESB. • Tightly integrated applications using MULE ESB. • Involved in implementing ESB flows, Proxies, logging and exception handling. • Extensively used Mule ESB components like File Transport, SMTP Transport, FTP/SFTP Transport, JDBC Connector, JMS and Transaction Manager. • Used TOAD for internal data storage and retrieval. • Involved in setting up Connection pooling and used JMS for Asynchronous messaging. • Setting up Mule ESB for the development environment. • Developed application using Mule ESB and deployed the services in dev, test and prod environments. And also done with Unit testing using Test Utility. • Migrated Mule ESB 3.7.0 apps to Mule ESB 3.8.4 • Applied OAuth authentication policy for API proxies • Have integrated web services including SOAP as well as REST using Mule ESB. • QA, UAT & Production issues investigation and supporting business users.

Mule Soft Team Lead Cisco Systems - San Jose, CA - August 2015 to May 2016 Project: Bay Bridge RMA Services • Design and implement the Mule ESB platform for Cisco. • Design and implement the RESTful WS using RAML to interact with AI system and storing in C3 Database. • Implemented the security for the SOAP and REST Web services using OAuth and Basic Authentication. • Designed and developed the core modules, which pulls service request details from CSOne System. • Design and developed common modules like Audit Logging, which can be used as a common module and shared resources for all the applications. • Designed the Exception handling for all the apps on Mule platform. • Designed the Domain to share the resource like HTTP, HTTPS & DB connector references. • Created flows for basic authentication and caching the token for OAuth. • Have carried out performance testing for the ESB flows for memory leakage and for fine-tuning. • Worked with Mule team on some of the issue with performance on DB connector. • Interacted with dependent teams (CSONE and PEGA) and came up with the design on the implementation of the flows and architecture and design of services. • Developed required back Java components. • Reported and worked on DB connector Connection pool issues to Mulesoft. • Reported and worked on MMC deployment issues with Mulesoft.

Technologies: Java 1.8, Oracle11i Web Services, Mule ESB, Mule API Manager, XML, JSON, Anypoint Studio, Maven, GIT, SVN, ESB Servers.

Technology Analyst Cisco Systems - San Jose, CA - December 2013 to July 2015 Project: OMLSS • Understanding of the complete architecture of the system including boundary systems. • Understand the client and project requirements by studying the existing documentation and seeking clarifications, if any, to participate efficiently in the Development and Testing phases of the project. • Create program specifications, unit test plans for software programs by studying functional and non-functional requirements, the application architecture document, and converting the assigned functionalities into pseudo code/algorithms/test cases. • Develop code using knowledge of relevant technology as per design specifications and document artifacts such as unit test scripts, etc. independently and support peers in identifying code defects and ensuring that the output is as per the given specifications and SLAs. • Perform testing - self and independent (Functional, Integration, System) - as per defined processes and guidelines to ensure accurate program output; identify and resolve defects, if any. • Work on 'Go Live' activities as per the Implementation plan and manage any issues related to functionalities, user interface, performance, etc. that may arise. • Respond to the issues assigned, conduct analysis of the issues assigned, identify and evaluate different workarounds/ solution alternatives, implement the most optimal solution, su

support other team members on issue resolution in areas of expertise as required, manage stakeholder communication and close the issues assigned in order to ensure support availability as per agreed SLAs. • Understand application architecture document and seek inputs from the architecture / design team to understand the overall architecture IN ORDER TO provide deliverables that are in line with architectural requirements. Technologies: Java 1.5, Web services, Oracle 11i, XML, Eclipse, HP Quality Center, SVN, Jenkins, uDeploy and uRelease. Sr. Software Engineer Cisco Systems - San Jose, CA - June 2013 to November 2013 Project: SPED Integration Responsibilities: • Responsible for development of Oracle Interfaces and Mapping data as per requirements of Cisco Brazil. • Involved in the development of PL/SQL queries to fetch data from the oracle and insertion of Data into Synchro Open Interface tables. This is a very critical data reporting as the data is to be reported to the Government of Brazil by Cisco as per the Legal Procedures. He was involved in the Development of Packages, Concurrent Programs and many other Custom functionalities as per the Requirements. • Experience in Cisco Quality Control process and Migration of Code into Different Environments. • Implemented the PL/SQL based on the requirements of AP and RI modules. Technologies: PL/SQL, Oracle Applications (Financials), PVCS, Kintana, Toad. Software Engineer Cisco Systems - San Jose, CA - April 2012 to May 2013 Project: IT Creative Solutions (ITCS) Responsibilities: • Understand the business process and build interactive online dashboards based on client requirement. • Do the data modelling to hold the current data, to sustain future needs and drilldowns in the dashboards. • Use dashboard building tools Xcelsius, Tableau to build interactive dashboards. • Develop business layer to perform all the calculations used in dashboard. • Do client interaction and communication to get required inputs. • Participated in Client Demos and meetings. Technologies: SQL Server, Tableau, Xcelsius. Software Engineer Arrow Electronics Inc - August 2011 to March 2012 Project: Arrow Unity (Sales Work Bench) Responsibilities: • Requirements gathering, designing, development and testing. • Ownership of the deliverables. • Involved in Post Production support for SWB application. • Coding and testing for enhancements. • Wrote Oracle PL/SQL Stored procedures, triggers, and views for backend database access. • UAT Testing Support. It was recently hosted in a 3rd party blogging platform TypePad. - The project required to find a platform which satisfies all the requirements and transfer all TypePad content to the Amazon owned platform while maintaining its functionalities and compatibility. - Used Velocity Templating Language, Java, Amazon Tools and Many Blogging Platforms. Mobile Widget Disparity July 2017 <https://www.linkedin.com/in/shreyanshu-gupta-135176103/> <https://www.amazonbookreview.com> - Due to some recent changes in Amazon configuration files, there was content disparity between book description of mobile and desktop in millions of products. - The project required to find the reason for disparity and then find a solution that doesn't affect other features & is also expandable. - Used Java, configuration files and Amazon Tools. Physical to Amazon Video Conversion July 2017 - To promote Amazon Video Over Physical Video source (DVD, Blu Ray), certain features were created like Popup Window and messages above Add to Cart button. - This project required to create UI for each of the features and check whether it satisfies all the criteria. - Used Java, JSP, configuration files and bean creation ADDITIONAL INFORMATION TECHNICAL SKILLS * Programming language: C, SQL, Core Java, Android, Velocity * Web Development - PHP, Basic knowledge of HTML * Basic knowledge of GIT Version Control System', {'entities': [(4167, 4170, 'Skills'), (4141, 4145, 'Skills'), (4117, 4120, 'Skills'), (4099, 4114, 'Skills'), (4088, 4096, 'Skills'), (4079, 4086, 'Skills'), (4073, 4077, 'Skills'), (4067, 4069, 'Skills'), (4063, 4066, 'Skills'), (4059, 4061, 'Skills'), (3950, 3953, 'Skills'), (3944, 3948, 'Skills'), (3812, 3814, 'Skills'), (3683, 3689, 'Companies worked at'), (3634, 3640, 'Companies worked at'), (3607, 3613, 'Companies worked at'), (3577, 3581, 'Skills'), (3304, 3310, 'Companies worked at'), (3102, 3108, 'Companies worked at'), (3096, 3100, 'Skills'), (3066, 3074, 'Skills'), (2980, 2986, 'Companies worked at'), (2701, 2707, 'Companies worked at'), (2648, 2654, 'Companies worked at'), (2586, 2593, 'Skills'), (2555, 2562, 'Skills'), (2476, 2483, 'Skills'), (2460, 2473, 'Companies worked at'), (2434, 2455, 'Designation'), (2385, 2406, 'Designation'), (2256, 2275, 'Skills'), (2251, 2254, 'Skills'), (2222, 2230, 'Skills'), (2218, 2220, 'Skills'), (2194, 2198, 'Skills'), (2170, 2173, 'Skills'), (2146, 2149, 'Skills'), (2121, 2125, 'Skills'), (2097, 2100, 'Skills'), (2069, 2076, 'Skills'), (2055, 2059, 'Graduation Year'), (1992, 2035, 'College Name'), (1964, 1970, 'Degree'), (1706, 1709, 'Skills'), (1700, 1704, 'Skills'), (1439, 1445, 'Companies worked at'), (1402, 1408, 'Companies worked at'), (1374, 1380, 'Companies worked at'), (1343, 1347, 'Skills'), (1074, 1080, 'Companies worked at'), (974, 980, 'Companies worked at'), (968, 972, 'Skills'), (938, 946, 'Skills'), (858, 864, 'Companies worked at'), (582, 588, 'Companies worked at'), (573, 579, 'Companies worked at'), (502, 506, 'Graduation Year'), (493, 501, 'Years of Experience'), (463, 488, 'Companies worked at'), (463, 469, 'Companies worked at'), (443, 449, 'Companies worked at'), (412, 441, 'Designation'), (187, 234, 'Email Address'), (116, 141, 'Companies worked at'), (116, 122, 'Companies worked at'), (97, 112, 'Skills'), (87, 95, 'Skills'), (83, 85, 'Skills'), (78, 82, 'Skills'), (52, 60, 'Years of Experience'), (17, 46, 'Designation'), (0, 16, 'Name')]]})

("Shrishti Chauhan Have total work experience of 2.5 years on Oracle Fusion Middleware - SOA, WebLogic and MFT Module. Bilaspur, Chhattisgarh - Email me on Indeed: [indeed.com/r/Shrishti-Chauhan/89d7feb4b3957524](https://www.indeed.com/r/Shrishti-Chauhan/89d7feb4b3957524) Seeking to hone and enhance my technical skills in Oracle Fusion Middleware while working as a professional in challenging and goal oriented environment. Willing to relocate to: Bengaluru, Karnataka WORK EXPERIENCE Technical Consultant Oracle - Bengaluru, Karnataka - October 2015 to Present • Have total work experience of 2.5 years on Oracle Fusion Middleware - SOA, WebLogic and MFT Module. • Have extensively worked on Support, Testing, Cloning, Monitoring and Maintenance support and Enhancement for the E-Commerce Project with multi system

module. • Have good understanding on End-to-End Business Process. • Experience in developing and deploying BPEL Processes using technology adapters (DB Adapter, File Adapter, FTP Adapter and JMS Adapter). • Part of a team for developing a BPEL process to integrate Oracle Fusion Applications. This Orchestrated BPEL Process had process activities like data conversion, transformation and fault handling. • Developed and deployed BPEL processes to import sales order and add lines to the sales order imported from external sources (Files and Databases) into Order Orchestration Module. • Worked on BPEL process to create sales order within Order Orchestration Module using SOAPUI and Enterprise Manager. • Have good understanding on Synchronous and Asynchronous processes, Transformations, XSD, XSLT and XPath • Installation of Middle tier application server (SOA Suite 11g), configuring and deploying application adapters and integrating with other ERP or 3rd Party Services. • Working with the client team and communicating with the business teams regarding integration with external Delivery System. <https://www.indeed.com/r/Shrishti-Chauhan/89d7feb4b3957524?isid=rex-download&ikw=download-top&co=IN> <https://www.indeed.com/r/Shrishti-Chauhan/89d7feb4b3957524?isid=rex-download&ikw=download-top&co=IN> • As an Oracle Technical Consultant I was responsible for providing End-to-End support in the project for Oracle Fusion Middleware.

• Good understanding of Service Oriented Architecture (SOA) with the middleware technologies for application integration. Technical Consultant Oracle Have total work experience of 2.5 years on Oracle Fusion Middleware - SOA, WebLogic and MFT Module. EDUCATION C.S. CHHATTISGARH SWAMI VIVEKANANDA TECHNICAL UNIVERSITY 2011 to 2015 SKILLS Xml, Oracle MFT, Core Java, Oracle SOA, WSDL, ODI ADDITIONAL INFORMATION TECHNICAL SKILL SET ERP Packages Oracle Fusion Middleware and Oracle Fusion Application (DOO/GOP) Fusion Middleware Modules Oracle SOA, MFT and Web Logic (11G and 12C Version) Adapters Database, JMS, FTP and File Tools JDeveloper, Enterprise Manager, Administrative Console, SOAP UI and BI Publisher Programming Languages XML, C++ and Core Java Databases SQL Operating System Unix and Windows PROJECT DETAILS Project Client HOLTS RENFREW Role & Duration Technical Consultant Oct-15 Scope of Project Oracle Fusion Middleware 11G and Oracle Fusion Application R12 Project Description Holt Renfrew is 180 years old chain of high-end Canadian department stores specializing in an array of luxury brands and designer boutiques. Responsibilities • Worked as Technical Consultant to the customer for the issues related to Oracle SOA (mainly BPEL and Mediator Components). • Providing daily Server Health Check for SOA and DOO/GOP (SCM) to the customer. • Attending/Conducting weekly customer calls and providing an update about the progress of the issues. • Interacting with the Clients to understand the requirement and details of the issues and providing suggestions/answers to their queries. • Resolving technical issues and enhancement raised by the customer. • Reviewing work products from the Team Members and delivering products to the client on time with high quality. • RCA for the Complex Issues in client's version of Oracle SOA and SCM. • Partially worked on functional issues related to DOO/GOP - Order Management and Inventory Management. • Working effectively with Oracle Product Support for any issue related to Standard Functionality. nded Anytime Heuristic Search A* Algorithm □ This Project presents a heuristic-search algorithm called Memory-bounded Anytime Window A*(MAWA*), which is complete, anytime, and memory bounded. MAWA* uses the window-bounded anytime-search methodology of AWA* as the basic framework and combines it with the memory-bounded A*-like approach to handle restricted memory situations. Simple and efficient versions of MAWA* targeted for tree search have also been presented. Experimental results of the sliding-tile puzzle problem and the traveling-salesman problem show the significant advantages of the proposed algorithm over existing methods. Technical and Co-Curricular activities □ Star Performer in Microsoft IGTSC in 2014. □ Paper Presentations on Applications of Robotics in INOX 2K12. □ Attended a Three-Day workshop on C and C++ Programming and Aliasing. □ Attended a One-Day workshop on Java and Hardware Workshop at VECW □ Paper presentation 4G Technologies, Cloud Computing, Heuristic Algorithms and Applications, Open Source Software. □ Multimedia presentations on Artificial Intelligence, 6th Sense, and Robotics. □ Completed training of OCA (9i, 10g) from Oracle University. □ Attended SPARK training program in Infosys Mysore. □ Attended System Hardware Training program at HCL, Pondicherry.

MAWA* uses the window-bounded anytime-search methodology of AWA* as the basic framework and combines it with the memory- bounded A* -like approach to handle restricted memory situations. Simple and efficient versions of MAWA* targeted for tree search have also been presented. Experimental results of the sliding-tile puzzle problem and the traveling-salesman problem show the significant advantages of the proposed algorithm over existing methods. **Technical and Co-Curricular activities** □ Star Performer in Microsoft IGT SC in 2014. □ Paper Presentations on Applications of Robotics in INOX 2K12. □ Attended a Three-Day workshop on C and C++ Programming and Aliasing. □ Attended a One-Day workshop on Java and Hardware Workshop at VECW □ Paper presentation 4G Technologies, Cloud Computing, Heuristic Algorithms and Applications, Open Source Software. □ Multimedia presentations on Artificial Intelligence, 6th Sense, and Robotics. □ Completed training of OCA (9i, 10g) from Oracle University. □ Attended SPARK training program in Infosys Mysore. □ Attended System Hardware Training program at HCL, Pondicherry.', {'entities': [(3036, 3040, 'Graduation Year'), (2717, 2959, 'Skills'), (2684, 2688, 'Graduation Year'), (2668, 2683, 'Degree'), (2662, 2666, 'Graduation Year'), (2599, 2641, 'College Name'), (2577, 2597, 'Degree'), (2571, 2576, 'Graduation Year'), (2505, 2546, 'College Name'), (2441, 2446, 'Graduation Year'), (2395, 2399, 'Graduation Year'), (373, 399, 'Designation'), (97, 115, 'Location'), (74, 96, 'Companies worked at'), (50, 54, 'Years of Experience'), (28, 48, 'Degree'), (13, 25, 'Name'), (0, 12, 'Name')]]})

(Sudaya Puranik Principal Engineer Technical Staff - Company 1 Bengaluru, Karnataka - Email me on Indeed: indeed.com/r/Sudaya-Puranik/eaf5f7c1a67c6c38 To secure a promising position that offers both a challenge and a good opportunity for both professional and personal growth. Willing to relocate to: Bengaluru, Karnataka WORK EXPERIENCE Principal Engineer Technical Staff Company 1 - Bengaluru, Karnataka - September 2005 to Present Total Experience: 12 years 6 months. Worked onshore and offshore for the projects. Extensive client facing and team management skills. Company 1: Oracle India Private Limited, Bangalore Designation: Principal Engineer Technical Staff Duration: September 2005 - till date KEY TECHNICAL SKILLS Databases: Oracle 9i/10g, MySql Language s: PL/SQL, Shell Script. Frameworks and Portals: Oracle ADF Server side Technology: J2ee, IDE: Jdeveloper 10.x TECHNICAL EXPERIENCE SUMMARY □ 1 year Oracle Applications checklist implementation □ 3+ years of Disaster Recovery on Oracle Applications (EBSO 11i, R12) and Database. □ 8+ years of Oracle Applications DBA with Build and Release activities. □ Installation of Oracle Applications (EBSO 11i, R12) at Customer environment and carry out DR □ Configuration of Oracle Applications (EBSO 11i, R12) as per Customer specification. □ Configuration of Discoverer, Admin, Concurrent, Forms, Web, Reports done on separate pillars □ Patching, Cloning of Oracle Apps □ Database conversion from non-RAC to 2 node, 3-node RAC □ Installation of OTO product on customer environment. Including the Infra, Asmt, discoverer, OC4J product. □ Carried out Disaster Recovery solutions for OTO □ Database Switchover code written for OTO □ Domain knowledge of Manual Testing. □ Oracle Apps Release and Build Engineer, □ Carried out 11i and R12 Upgrades on Oracle Internal Customers. □ Carried out 12.2.X upgrades from 11i and R12 baselines with 11g and 12c database level <https://www.indeed.com/r/Sudaya-Puranik/eaf5f7c1a67c6c38?isid=rex-download&ikw=download-top&co=IN> □ Experienced with Database upgrades as well. Carried out upgrades from 10g to 11g, 11g to 12C DB. □ Have been awarded Extra Mile Award 2 times for execution of projects on time with quality. Principal Engineer ORACLE - September 2005 to Present Oracle Apps DBA for R12 and 12.2.X baselines, responsible for all the EBS release activities, handled upgrades with latest adopt technology. EDUCATION Bachelor of Engineering (Information Science) in Information Science B V Bhoomaraddi College of Engg and Technology Hubli - Hubli, Karnataka 2005 Visveswararaja Technological University - Belgaum, Karnataka SKILLS Oracle Apps DBA Release Enginner ADDITIONAL INFORMATION Software/Tools • Test cases written in MS Word • Carried out manually as QTP does not support this Application 5) Disaster Recovery Portal for carrying out Recovery on the Customers. • It involves a portal through which we provide the Customer details and host types. There are xml plug-in, which are installed and parsed as Workflows. The workflows contain the steps of the DR for the MT and DB. As and when required we can pause and skip during the recovery. Tool tested and verified by the On Demand Operations and Customers like GE, Xerox, RIT etc. Client: On Demand Operations, Oracle Bangalore Roles and Responsibilities: • Developed all the plug-in needed for the recovery which include Database Plug-in, E-business Suite Plug-in. • Monitoring and Support 24/7 Team Size: 2 • Software /Tools: Shell and Expect scripting. 4) DR Solution for R12 (E-Business Suite) It involves setting up the primary by installing Oracle Apps R12, setup the standby site i.e Database, Mid Tier, by cloning the same and recover. It also involves operations like Switch Over and Fail Over. By Switch Over we mean Primary to Standby and vice versa By Fail Over we mean the Primary has crashed, we need to make the Standby as the Primary. Client: On Demand Operations, Oracle Bangalore Team Size: 2 Software /Tools: Shell and Expect scripting, PLSQL. Roles and Responsibilities: • Installation, Cloning, Patching of the Oracle Applications R12. • Conversion of Database from non-RAC to RAC • Setting up of the Standby. • Carry out the Switchover, Fail over and Recovery. • Carryout the whole Recovery Process through the UI. 3) On Demand Service Continuity The project dealt with "Disaster Recovery & Backup" which involves automating checks so that disaster could be prevented. Also the recovery of database is involved. Client: On Demand Operations, Oracle Bangalore Team Size: 5 Software /Tools: Unix Advanced shell scripting and expect. (Involves working on Korn Shell) Roles and Responsibilities: • Automated the checklists for E-business suite and PeopleSoft products. 2) CCB Portal Administration Project Description The new CCB Administration component is an integrated, web-based application intended to consolidate and simplify the CCB processes for On Demand. This application: • Makes it easier to manage the process of change implementation in customer instances across the various milestones in the On Demand life cycle. • Simplifies said change implementation by keeping the information organized in a centralized repository. • In the CCB Administration application Release 1.0 Client: System Assurance Centre, Oracle

e Unites States of America Team Size: 3 Software /Tools: PL/SQL and HTML Roles and Responsibilities: * Developed the PL/SQL procedures & packages, HTML forms required for the Portal, using HTML for the user to enter the required data. * The data is entered is validated, using Java Scripting, and the data is stored in the database. * Developed the reports. 1) ORACLE PRODUCTION ASSESSMENTS Project Description AUTO VERIFY TOOL Auto Verify is a utility that automates many of the tedious and repetitive tasks that are involved during QA testing of an Oracle Applications Release 11i environment. Auto Verify now performs many of the tasks automatically that used to be performed manually. Client: System Assurance Centre, Oracle Unites States of America Team Size: 4 Software /Tools: UNIX Advanced Shell Scripting, PL/SQL. Roles and Responsibilities: Automated the all the checklists for 8 releases of E-business suite.', {'entities': [(2656, 2689, 'Skills'), (2586, 2626, 'College Name'), (2580, 2585, 'Graduation Year'), (2506, 2558, 'College Name'), (2436, 2505, 'Degree'), (1945, 1989, 'Email Address'), (736, 886, 'Skill s'), (589, 617, 'Companies worked at'), (391, 400, 'Location'), (303, 312, 'Location'), (106, 150, 'Email Address'), (63 , 72, 'Location'), (52, 61, 'Companies worked at'), (15, 50, 'Designation'), (0, 14, 'Name')]]})

Syam Prasad Devendla • Good knowledge and understanding of different frameworks for multimedia. • Good knowledge of multi-threaded programming and IPC mechanisms. • Excellent interpersonal and communication skills and ability to work in a team. • Skilled at learning new concepts quickly, working well under pressure, and communicating ideas clearly and effectively. • Tools Used: Beyond Compare, Samsung memory leak tool, and Samsung code coverageTool, VS 2005 Remote Tools, KlocWork, WinShark and Ethereal. • Experienced in working with configuration tools like VSS, Perforce, and Clear Case. • Operating Systems: Windows, Ubuntu Linux • Mobile Platforms: SHP, Bada, Linux, WindowsMobile5.0, SLP and Tizen • Technology: Multimedia, Content, Mobile Applications • Languages: C, C++(Data Structures, Design Patterns, STL) • Tools: Eclipse, VS2005, VS2010 KlocWork, Clear case, Perforce Projects • OBIEE Environment: Oracle BI Languages: C++ • Implementing enhancements, improving the diagnosability and address the customer issues by fixing the code bugs. • Developed a security feature in downloads module to protect the system from DOS attack. • Implemented a performance enhancer logic in Ibots to execute the agents faster. • Responsible for fix/enhance Ibot(Delivers/Agent/Schedulers) issues in the product. • Responsible for fixing the co

re dump issues reported by customers in the nqscheduler component in linux 32/64 and windows 32/64 platforms. • Oracle-Thirdeye Environment: HDFS, Yarn, Hadoop, map-reduce, thirdeye-agent • GUI is able to provide all information in a usable environment. • Most of the use will be as an embeddable UI in applications like TLP, DTE, and Bug DB etc. Syam Prasad Devendla • Provide term, line number and time indexes for word and phrase search, ability to drill down to a given line number and data around it, and also have ability to see data around a given time. • Thirdeye-nodes-refresh Environment: HDFS, Yarn, Hadoop, map-reduce • All processes for thirdeye including Hadoop components running on the same node. This overburdens the master node and leads to frequent failures due to disk space and memory issues, so worked on POC to replicate entire thirdeye setup with required configuration on new machines. • BI-Manifest-Comparison Tool Environment: Oracle BI Languages: Java • Implemented tool to create an excel with manifests data across platforms and painted the mismatched versions • WebRTC Environment: Browser Languages: C++ • Media Recorder implementation. • Multi Party communication development. • Stage Fright (recorder and playback) • Video engine • Peer connection • PlatformsY2012-Framework (content) Environment: Tizen Languages: C++ • Developing Tizen framework (content) on SLP. • File Search • Directory Search • Playlist and Playlist Manager • Supporting Tizen content framework. • PlatformsY2011 -Framework (Multimedia- player) Environment: Bada, Eclipse, SLP (Samsung Linux Platform) Languages: C++ • Implemented player framework for Bada OS • Audio Player and video Player modules. • POC of AV synchronization for video zoom. • Supporting Bada2.0 player framework and commercialization. • Movie Studio (Video Editor) Environment: Bada, Eclipse Languages: C++ • Developed application based on UI guidelines given, modules like preview, split and trim forms using VePlayer library. • Implemented VPL file creation. • Media Browser Environment: Bada, Eclipse Languages: C, C++ • This application is developed to check the stability of Bada's player and Audio out modules. • Audio Player and video Player modules. • Implemented progress bar of player in both Player Form and PLS Player Form. • Bada-NS(R&D) Environment: Linux, SLP (Samsung Linux Platform) Languages: C, C++ • Worked on launching emulator • knowledge of SLP Multimedia Framework • Ported Player (Audio and Video) module • Ported Audio Out and Audio In modules using ALSA library • ETMs Firmware Client: Wabtec Railway Electronics, German Town Syam Prasad Devendla Environment: Windows XP, IAR Workbench Hardware: IOC board (Provided by WRE) Languages: C • Serial - Ethernet Bridge • Serial communication commands handling. • Supt Link Client: Schindler Elevator & Escalator Corporation Environment: Windows Mobile 5.0, embedded VC, Visual Studio 2005 Languages: VC++, MFC • A Business application. It makes easy for the superintendents to check the status of the elevators and escalators which are newly installed or being maintained and rate them according to their performance and report the same to the Sap server using mobility solutions. • FldLink Client: Schindler Elevator & Escalator Corporation Environment: Windows Mobile 5.0, embedded VC, Visual Studio 2005 Languages: VC++, MFC • FldLink is a Mobile Application which provides the technicians with a single, comprehensive view of contact information, meeting schedules, Technical information and repairing support while working in the field.", {'entities': [(7711, 7715, 'Graduation Year'), (7293, 7297, 'Graduation Year'), (3847, 3851, 'Graduation Year'), (3461, 3465, 'Graduation Year'), (1416, 3890, 'Skills'), (721, 1220, 'Skills'), (708, 712, 'Graduation Year'), (686, 707, 'College Name'), (628, 685, 'Degree'), (622, 626, 'Graduation Year'), (599, 603, 'College Name'), (556, 597, 'Degree'), (381, 390, 'Location'), (365, 378, 'Companies worked at'), (359, 363, 'Designation'), (56, 102, 'Email Address'), (14, 23, 'Location'), (0, 13, 'Name')]]}

(Tejasri Gunnam Bengaluru, Karnataka - Email me on Indeed: indeed.com/r/Tejasri-Gunnam/6ef1426c95ee894c • 3 years of experience in IT industry, involved in Software Testing. • Proficient in development of Test Plans, Functional test scripts for Functionality Testing and Integration Testing, Test Execution, Defect Reporting, Regression Testing. • Very Good in GUI, Functional and Performance testing. • Well Acquainted With Bug Tracking Tools like CD ETS, BUG SCRUBBER, MANTIS, JIRA • Profound Knowledge in Software Testing Life Cycle. • Involved in Preparing Test Cases and Test Reports. • Knowledge on Quality Standards like ISO • CCNA certified • Very good knowledge in security testing. • Knowledge in Python scripting. WORK EXPERIENCE Cisco SystemsIndPvtLtd - Bengaluru, Karnataka - September 2012 to Present under the payroll of GoldStone Technologies Agile team Member, Testing, Security testing Cisco SystemsIndPvtLtd - Bengaluru, Karnataka - September 2012 to Present Duration Sep 2012 - Till date Team Size 15 Members Role Agile team Member, Testing, Security testing Description: CSPC is a collector which is integrated with different CSOs (Common Service Objects) like the device discovery CSO, core collection, connectivity and data normalization. Together we call as CSPC or Common Services Platform Collector. CSPC-NOS is an add-on service which is written on top of the CSPC i.e., extra software written by the Nos team based on the CSPC 2.0 base code to cater to a group of customers. CSPC-NOS support on both Windows and Linux C ent OS platform. The Windows CSPC-NOS client can connect to the CSPC-NOS Linux server and vice-versa. Devi

ces can be added manually or using the import seed file. When importing a seed file/ When Device discovery is triggered the Device discovery module collects light inventory data from the devices. The light inventory data contain information like Sys Object Id, device family, OS-version etc. . (This information collected can be seen by going to Reports->Managed Devices) This light inventory data is used by the inventory module to load the model rule for the respective device. This data is also used by the base collector to decide whether the device is managed or unmanaged.

- DB Export and Import across the landscape.

PROJECT (Implementation): 2 Organization: IBM India PVT LTD Role: SAP Basis Consultant Client: Maersk Line- MLIT Build Basis Database: Oracle 11g Platform: Linux 2.6 Period: September 2016 to July 2017 Responsibilities: • Creation Database Source in Java systems. • Creation of Product, Software Component, Business Systems and Technical Systems in PO SLDs. • Performance capture whenever test load went into the system. • Troubleshooting JAVA and ABAP stack systems. • Creating source systems in BW systems, Maintaining and troubleshooting RFC connections for the same. • Client opening and closing depending up on requirement. • Creating OSS messages on various issues to SAP in SMP. • SSO Configuration in Solution Manager.

PROJECT (Support): 3 Organization: IBM India PVT LTD Role: SAP Basis Consultant Client: Ericsson Database: Oracle 11g Platform: Linux 2.6 SAP: ECC 6.0, BW ABAP 7.31 Period: July 2013 to November 2014. Responsibilities: Performed all SAP Basis Activities like Performance monitoring, Monthly report generation. • Printer configuration. • Detecting Expensive SQL statements • Monitoring and troubleshooting JAVA systems using NWA and admin tools like Visual Admin tool and Config tool. • Table space monitoring using BRTOOLS. • Database Administration using BRTOOLS. • Kernel upgrades for the entire landscape. • Part of EHP upgrade from ERP6.0 EHP 6 to ERP6.0 EHP 7

PROJECT (Support): 4 Organization: IBM India PVT LTD Role: Associate SAP Basis Consultant L1 Client: Unilever, UK Database: Oracle 10g Platform: Linux 2.6 Linux V 6.2 SAP: ECC 6.0, BW ABAP 7.31, CRM 7.31 Period: May 2012 to June 2013. Responsibilities: Performed all SAP Basis Activities like Production System Performance monitoring, Monthly report generation. • Performance Monitoring for ECC, BI, SRM, CRM, and PI systems. • Handling User tickets. • Background Job Administration such as scheduling/Cancelling and Troubleshooting background jobs as per client requirement \

- Performed daily health checks across the landscape.
- Analyzing and troubleshooting daily issues occurred in health checks.
- Importing Transports across the Landscape.
- Creating/modifying User roles as per client requirement.

("Vikas Singh Chandigarh, Chandigarh - Email me on Indeed: [indeed.com/r/Vikas-Singh/8644db42854c4f6a](https://www.indeed.com/r/Vikas-Singh/8644db42854c4f6a) I've 4.6 years of IT experience in Identity and Access Management with Infosys limited. It involves troubleshooting and resolving workflow errors and provisioning user access. I perform identity and access management activities, updating existing access and provisioning workflows, manage operations within the IAM environment. Currently I'm working on automating the work flow of Security Intelligence and Response Team with Phantom and Python scripting. I'm trained in Python, Solaris administration, Java and PLSQL. I'm able to handle multiple tasks and work as a team Member. I've excellent analytical, problem solving and programming skills. I'm committed; goal oriented, & has zeal to learn new things & technologies. I am graduated in Electronics and Communication Engineering in 2013 with excellent grades. I possess good problem solving & interpersonal skills, good communication skills and team spirit.

WORK EXPERIENCE Technology Analyst Infosys Limited - Chandigarh, Chandigarh - October 2013 to Present

A. Change Management: Installing and upgrading RT and RTIR for improved request handling with MySQL database.

B. Python Automation: Automating various use cases for the Security Intelligence and Response Team using Python scripting and Phantom tool integrating it with various tools i.e. Splunk, Request Tracker for Incident Response (RTIR), Remedy etc. Below are the use cases details: Use Cases Description Proxy Blocks Enable the ability to block domains and URLs automatically on Bluecoat proxies using a list maintained in SPLUNK Palo Alto Blocks Enable

the ability to block domains and URLs automatically on Palo Alto proxies using a list maintained in SPLUNK Threat Intel Email feed ingestion Take emails from an external distribution group and parse the emails for IOCs Email Eradication When a Malicious email has been detected as being received in the Microsoft Exchange email system perform eradication steps to remove the email from the email messaging platform Email Quarantine Email addresses alerted as malicious need to be added to a quarantine list Malware Response When malware is detected by alert or scanning initiate containment procedures for the affected device in question Unapproved Devices <https://www.indeed.com/r/Vikas-Singh/8644db42854c4f6a?isid=rex-download&ikw=download-top&co=IN> When alerts for Unapproved Devices, equipment that is not in Organization's asset inventory, is triggered containment needs to occur for the device in question IOC Detect and Scanning using Tanium and Fireeye HX When Indicators of Compromise, IOC, are received from various sources, threat intel feeds, exploded malware the network environment needs to be scanned for any of the indicators of compromise provided. Clear Text Passwords detected Automatically flag users password to reset in Active Directory when an alert in SPLUNK for a clear text password detected fires Create ticket from Splunk or MSSP Alert Develop a script that takes the details of an alert from an alert generated in SPLUNK and create or append to a ticket in the ticketing system in use Triage and Identification Execute the triage and identification steps that are performed manually today Information Security Analyst Infosys Limited - Chandigarh, Chandigarh - 2013 to Present A. Identity management Infosys Limited - May 2014 to December 2017 management May 2014 - Dec 2017 Following are my roles and responsibilities in the project: A. Identity management: Tracking and processing identity creation for all the new hires along with basic access e.g.: Email, Active Directory accounts and including mandatory security related groups. Also, making sure access is disabled on the user's departure date and cleaning up of all the access. Reviewing access periodically and updating it accordingly. B. Access management: This involves provisioning/de-provisioning access to users across 300+ applications using various global and in house tools like RSA security console, SAP, Identity IIQ etc. across multiple platforms like, UNIX, Database and application front end. Making sure standard operative procedures (SOP) are followed, validation checks are completed and appropriate approvals are gathered before access is granted. C. Quality Management: Performing quality checks on random samples of requests on daily basis and sharing QAP results with administrators. - Monitoring and tracking the corrective actions are taken within defined timeframe. - Doing RCA on major issues - Developing Service Improvement Plan (SIP) and Process Improvement Plan (PIP) based on the QAP analysis D. Risk Management: Identifying risk areas through daily and periodic report E.g. Segregation of duties violation (SOD) report, Active directory infraction report etc. - Working with various teams to mitigate the violations. - Assisting auditors by provide details and justification on audit samples. E. Client Coordination: Coordinating with client daily, weekly for the operations, issues and feedback with the respective reports prepared. EDUCATION Bachelor of Technology in Electronics and Communication Engineering GLA Institute of Technology and Management - Mathura, Uttar Pradesh September 2009 to June 2013 SKILLS SECURITY (5 years), INFORMATION SECURITY (5 years), ACTIVE DIRECTORY (3 years), UNIX (Less than 1 year) ADDITIONAL INFORMATION TECHNICAL SKILLS • Operating Systems: Windows, Solaris • Languages: Python, Core Java, SQL, Unix • Software: Sailpoint IIQ, Oracle IAM, Beeline, SAP, Active Directory, Phantom, Quest change auditor, Microsoft Office Suite • Information Security: Concepts and best practices", {'entities': [(5347, 5750, 'Skills'), (5333, 5337, 'Graduation Year'), (5240, 5282, 'College Name'), (5171, 5238, 'Degree'), (3426, 3442, 'Companies worked at'), (3385, 3389, 'Graduation Year'), (3371, 3381, 'Location'), (3359, 3369, 'Location'), (3340, 3356, 'Companies worked at'), (1104, 1108, 'Graduation Year'), (1082, 1092, 'Location'), (1070, 1080, 'Location'), (1051, 1067, 'Companies worked at'), (1030, 1050, 'Designation'), (887, 891, 'Graduation Year'), (57, 99, 'Email Address'), (24, 34, 'Location'), (12, 22, 'Location'), (0, 11, 'Name')]]}

("Yasothai Jayaramachandran Lead Engineer - Automation & Testing Chennai, TAMIL NADU, IN - Email me on Indeed: [indeed.com/r/Yasothai-Jayaramachandran/c36e76b64d9f477f](https://www.indeed.com/r/Yasothai-Jayaramachandran/c36e76b64d9f477f) □ 4 years of experience in testing methodologies: Automation, Regression, Sanity and Manual. □ Hands-on experience in Selenium Webdriver with Python Automation. □ Skilled in IDE's Pycharm, Eclipse[Pydev plugin], Selenium for testing the web browser using Python. □ Expertise in developing automation scripts and testing various components. □ Skilled in providing effective and quality automation process. □ Hands-on experience in functional automation scripts using TCL Programming, Python. □ Experienced in planning, designing, developing and deploying testing strategies. □ Trained and worked closely along with developers and dev-test (manual) engineers for automation tasks. □ Good experience in reviewing the automated TCL, Python Scripts developed by the team members. □ Extracting data from excel and csv files, posting results in excel file with Python. □ Experience in Agile development -Played responsible role Scrum master for Automation. WORK EXPERIENCE Lead Engineer - Automation & Testing Cisco Systems - January 2014 to Jun

e 2015 DURATION Jan-2014 to Jun-2015 TEAM SIZE 20 ROLES AND RESPONSIBILITIES Lead Engineer - Automation & Testing • Identified the cases for giving the support to the WAAS product with v6 addressing from the test plan • Played an active role - Scrum Master for the Automation. • Activity participated and organized the automation team to work on agile methodologies. • Prepared the HLD document for the automatable cases. • Automated around 1000+ cases in SNMP and Platform module. • Automated the basic sanity test cases and executing sanity testing for the v6 support. • Involved in regressing all the automated suites. • Performed regression for all the automated cases through ATS framework with aetest script template. • Reviewed the automated cases developed by team members. • Regression Testing • Defect filing in CDETS/Rally • Worked on Agile development methodologies LANGUAGE TCL Programming, Python, Selenium <https://www.indeed.com/r/Yasothai-Jayaramachandran/c36e76b64d9f477f?isid=rex-download&ikw=download-top&co=IN> <https://www.indeed.com/r/Yasothai-Jayaramachandran/c36e76b64d9f477f?isid=rex-download&ikw=download-top&co=IN> RELEASES Hornet DESCRIPTION • IPv6, formerly named IPng (next generation), is the latest version of the Internet Protocol (IP). IP is a packet-based protocol used to exchange data, voice, and video traffic over digital networks • Cisco's Wide-Area Application Services IPv4 users can move to IPv6 and receive services such as end-to-end security, quality of service (QoS), and globally unique addresses. The IPv6 address space reduces the need for private addresses and Network Address Translation (NAT) processing by border routers at network edges. • Implementing basic IPv6 connectivity in the Cisco IOS software consists of assigning IPv6 addresses to individual router interfaces. The forwarding of IPv6 traffic can be enabled globally, and Cisco Express Forwarding switching for IPv6 can also be enabled • The primary motivation for IPv6 is the need to meet the demand for globally unique IP addresses. • Mainly involves to check the functionality of all waas features to work with v6 addressing PRODUCT IPv6 Support on WAAS (Wide Area Application Services) PROJECT CISCO-WAAS Express (WEXP) Member Technical Staff - Automation & Testing Cisco Systems - January 2013 to December 2013 DURATION Jan-2013 to December-2013 TEAM SIZE 21 ROLES AND RESPONSIBILITIES Member Technical Staff - Automation & Testing • Identified the automatable cases from the test plan. • Prepared the HLD document for the automatable cases. • Automated test cases for various components on the wexp product for the functionality check. • Worked on Config_Sync, HTTP, HTTPS, SSL, SMB_AO component automation. • Automated around 200+ cases for various components. • Performed regression for all the automated cases through ATS framework with aetest script template. • Reviewed the automated cases developed by team members. • Involved in executing all the automated cases for various releases as Phase1, Phase2 (pi19-25) and posted results in TIMS tool. • Regression Testing • Defect filing in CDETS LANGUAGE TCL Programming, Python RELEASES Phase1 &Phase2 (with 535) DESCRIPTION • Cisco's Wide-Area Application Services (WAAS) Express feature is a key component of the Cisco WAAS product portfolio. WAAS Express is a cost-effective, IOS-based, WAN optimization solution that increases the amount of available bandwidth for small-to-mid-size branch offices and remote locations, while accelerating TCP-based applications that operate in a WAN environment. • The Wide-Area Application Services (WAAS) Express software optimizes TCP traffic flows across a WAN. WAAS Express integrates with native services such as security, NetFlow, and quality of service (QoS). WAAS Express provides the following benefits: □ Bandwidth optimization □ Application acceleration □ Increase in remote user productivity □ Interoperation with existing Cisco WAAS infrastructure □ Network transparency □ Deployment flexibility with on-demand service enablement • The Wexp is about the wide Area Application Service on IOS (Router) itself. • Mainly involves to check the functionality of optimizing the various Ao's like HTTP, SSL, HTTPS, SMB and Config_sync. PRODUCT WAAS Express (Wide Area Application Services) PROJECT CISCO-WAAS CLIENT Cisco Systems ORGANISATION HCL Technologies Ltd Software Engineer - Automation & Testing - June 2011 to December 2012 • Identified the automatable cases from the test plan. • Prepared the HLD document for the automatable cases. • Automated test cases for various components on the waas product for the functionality check. • Worked on Platform, SNMP, SSL, HTTP component automation. • Automated around 600+ cases for various components. • Performed regression for all the automated cases through ATS framework with aetest script template. • Active Participation in automating test cases for sanity test. • Reviewed the automated cases developed by team members. • Involved in executing all the automated cases and reporting bugs/defects. • Worked on various releases of the products (Lancer, Phoenix, Skyhawk) for regressing the automated cases and posted results in TIMS tool. • Defect filing in CDETS LANGUAGE TCL Programming, Python RELEASES LANCER, PHOENIX, SKYHAWK, SPRIT DESCRIPTION • Wide Area Application Services (WAAS) is a Cisco Systems technology that improves the performance of applications on a wide area network (WAN). WAAS combines Cisco's Wide Area File Services (WAFS-products allow remote office users to access and share files globally at LAN speeds over the WAN) with WAN optimization inside of a router, accelerating TCP-based applications on a given network. • WAAS system consists of a set of devices called wide area application engines (WAEs) that work together to optimize TCP traffic over your network. When client and server applications attempt to

communicate with each other, the network intercepts and redirects this traffic to the WAEs so that they can act on behalf of the client application and the destination server. • The WAEs examine the traffic and use built-in application policies to determine whether to optimize the traffic or allow it to pass through your network un optimized • Mainly involves optimizing the various Ao's like HTTP, SSL, HTTPS and functional wise platform check. PRODUCT W AAS(Wide Area Application Services) EDUCATION B.E in CSE ANNA University 2011 Day Adventist Matric Hr.Sec School 2005 to 2007 SKILLS optimization (2 years), Python (4 years), router (4 years), TCL (4 years), Te sting (4 years) ADDITIONAL INFORMATION Technical Skills Programming Languages Python, TCL, Power Q uery, SQL, Shell Scripting, C# Concepts Networking, WAAS (Wan Optimization), WAAS on Router, WAE(Wide Area Engine), WCCP Protocol, Automation Framework ATS (Automated Test System), Selenium Testing Framewo rk IDE(Integrated Development Environment) Eclipse, Pycharm, Pydev[Plugin for eclipse IDE] Software Eclipse C DETS & Rally (Bug Tracking), eARMS (Regression testing), ACME(Versioning), TIMS(Reporting), HTMLTestRu nner, Power Query(Automation), ARAS PLM(Product Lifecycle Management), AML Studio (adaptive markup lang uage) Operating Systems Windows XP/10, Linux", {'entities': [(7880, 8486, 'Skills'), (7829, 7836, 'Years of Experie nce'), (7810, 7817, 'Years of Experience'), (7795, 7802, 'Years of Experience'), (7777, 7784, 'Years of Experience'), (7745, 7837, 'Skills'), (7731, 7735, 'Graduation Year'), (7687, 7722, 'College Name'), (7681, 7685, 'Graduation Year'), (7664, 7680, 'College Name'), (7652, 7662, 'Degree'), (6598, 6611, 'Companies worked at'), (5659, 5663, 'Graduat ion Year'), (5629, 5650, 'Companies worked at'), (5560, 5573, 'Companies worked at'), (3651, 3672, 'Companies wo rked at'), (3503, 3516, 'Companies worked at'), (3481, 3502, 'Companies worked at'), (1304, 1325, 'Companies work ed at'), (1288, 1301, 'Designation'), (1174, 1187, 'Companies worked at'), (1152, 1173, 'Companies worked at'), (113 6, 1149, 'Designation'), (170, 177, 'Years of Experience'), (102, 166, 'Email Address'), (64, 71, 'Location'), (42, 63, ' Companies worked at'), (26, 39, 'Designation'), (0, 25, 'Name')]]}

Role: Senior Systems Engineer • Working as Maximo Consultant for Bombardier Transportation, Canada

- Strong knowledge in Maximo configuration using Automation Scripting, Database configuration, Application Designer, Domains, Workflows and other major applications
- Providing efficient solution for the issues related to Work orders, Asset configuration, Item Master, Preventive Maintenance, Inventory, Domain related issue
- Thorough implementation, support knowledge of Bombardier Transportation Maximo version 4, 6, 7.1 and 7.6.
- Having experience in Maximo Implementation, L2 and L3 support, and deployment activities
- Having experience in Incident Management, Problem management, Change management, Service Request, and other applications.
- Delivering 100% effectiveness in resolving ticket by ensuring compliance with client Service Level Agreements (SLAs)
- Developing Conditional Queries/Reports to verify the desired results.
- Worked on various formal and informal production reports.
- Created the template for maintaining the application maintenance activities.
- Worked in many configuration management applications for asset management related activities for future implementation.
- Working in 24*7 support. Resolved many critical issues which appreciated by client

BIRT Reports BTRAMR0001SYSER.rptdesign (Work order report):

- My client was using default BTRAMR2 Work order reports. They also use a different work order report in Maximo V4 and V6. The earlier used report have many drawbacks such as No Flexibility for modification since it is used by many divisions Empty boxes, lot of missing information Not align with Systems objectives and processes Historical context on the asset is missing Esthetical issues: Font too small, input fields not instinctive No bar coding used
- The outcome of this report is a form to support technician's work and regulation and give them simplicity to input information. It covers the full spectra of requirements of System Services divisions.
- This report is site specific one and it will display the WO details along with its task WOs and failure reporting information.
- Each site is having their own logo. This current report will display the logo based on site.
- It was implemented in V7.1 only. In V7.1 we do not have the option of auto resetting page numbers (i.e., while displaying multiple WOs, for each new WO page number will not be reset automatically) . I have implemented this option in this report.
- Language Translation was used for this report in German and French
- I did not use IBM templates for this report. I have customized our own template in this report.

BTRAMR0009.rptdesign (Availability Report):

- This particular report relates to the requirement of the business to be able to create a Availability Graph based on selected Train Assets, a timeframe and selected work types / work order parameters.
- Availability can be calculated based on a Fleet or a single Train. The business requirement is to be able to select this base as needed to suit the project or view needed at that time.

BTRAMR0027.rptdesign (Card Stock Report):

Existing report functionality:

- Technician requiring a part will take the component in its bin along with an Inventory Card. The technician reports the consumption at the exit of the storeroom on the Kiosk computer where he scans its Work Order and the Inventory Card in the application Issue and Transfer of Maximo. When we rebuild something internally, the technician will bring the new assembly in store, grab the Inventory Card and he will report the return in store against the rebuilt Work order.

Objectives:

- Created a card stock report in order to match the existing Inventory Card tool developed by Systems.
- Increase reporting of consumption
- Redefine the process of cycle count (80% efficiency in Systems)
- The report will be based on inventory information and will introduce the notion of real time to increase precision

BTRAMR0001SBB.rptdesign (Report Change):

- The report BTRAMR0001SBB was developed for the European project. It is based on the BTRAMR0001MLM report and currently uses only launch option 2 and 3 of the BTRAMR0001MLM report. The client requested to have option 1 (type=1) of the BTRAMR0001MLM implemented in the BTRAMR0001SBB report as well as the translation of the labels from French to English.

Objectives:

- To have define the type=1, report definition for BTRAMR0001SBB
- To have the labels translated from French to English

BTRAMR0002.rptdesign (Systems Purchase Requisition Report):

- The current PR report does not have bar-coding feature and is formatted too small. This is an operational report; it will be used in real time.
- Have a common and standardized PR report across all Systems services sites with the support of bar-coding

Incident Management Solution report:

- The report displays the overall ticket progress. It shows count of tickets raised and assigned to both Infosys and Client queue. We can view the total no. of tickets raised for various application groups such as Maximo, Kronos and BIEM. It also further categories the ticket count based on ticket priority and the status. This helps in analyzing the data from ticketing tool.
- There might be cases where different teams work on the tickets raised. This reports helps to analyses the team wise ticket count. We can there by monitor the performance of various teams.
- This report displays the number of Incidents and Service Requests logged in each month. Also it shows total tickets (Incidents + Service requests) logged in each month.
- This Report shows the number of tickets logged per country and it has been grouped month wise for various application gr

ous such as Maximo, Kronos and BIEM within a date range. Vend_Reported_hrs. rptdesign (Vendor Reported Hours): • This report will fetch the details of vendor type labor working hours for each WOs. Role: Quality Anchor • Working as Quality Anchor for my team, which involves creating defect prevention analysis, tracking all the works and auditing for quality • Providing Statistics about the monthly activities done by the team • From defect prevention analysis focus on specific topic and conducting brainstorming session with team to avoid the defects • Responsible for gathering the requirements from Client and participate in Client Conferences. • Divide the requirements into various sprints based on the velocity. • Distribute the requirements to the team and monitor the development progress and provide clarification on the technical/functional requirements. • Mentor for the new members joining the team. Other Job Related Activities: • Successfully Completed Training in Design Thinking course and Kronos tool which keeps tracks on Work force management. Maximo consultant Infosys Limited around 4.8 years) • IT professional with 4.4 years of experience in BIRT reporting, application support in IBM MAXIMO Application. • IBM Certified MAXIMO ASSET MANAGEMENT, PURCHASE ORDER, PROCUREMENT, PURCHASE REQUISITION Professional • Submitted Internal tutorial document on Configuration of Hover Dialogs and Its usage in Maximo V7.6 • Worked on various customer requirements and having overall experience with ☐ Preventive Maintenance ☐ Maximo automation and implementation ☐ MBO customizations ☐ Data Supply chain ☐ Portals, Workflows Designing ☐ Reports/Query Creation ☐ Work order tracking, Invoicing, Purchase order ☐ Asset Management ☐ Maximo Integration Framework (MIF) ☐ Labors, Crews, Security Group Set up ☐ Domains, Database configuration ☐ Basics of BIRT, Cognos Reporting, Monitor logs from Admin console. ☐ Maximo Java customization ☐ Maximo Installation/Upgradation ☐ Basic WebSphere function • Strong interpersonal skills and the ability to work in team efficiently. Customer Service support experience in a helpdesk environment. • Strong dedication towards work to ensure delivery of projects according to the schedules. Proactively approached for delivering excellent customer service and liaising with stakeholders. • Ambitious, enthusiastic and highly motivated person with excellent problem solving skills and also having ability to quickly master new technologies and skills. • Maintains effective work behavior in the face of setbacks or pressure. Strong multi-tasking capability, target and deadline oriented. • Engaging and resilient communicator demonstrating influencing skills and an ability to adapt approaches to differing situations Role: Senior Systems Engineer • Working as Maximo Consultant for Bombardier Transportation, Canada • Strong knowledge in Maximo configuration using Automation Scripting, Database configuration, Application Designer, Domains, Workflows and other major applications • Providing efficient solution for the issues related to Work orders, Asset configuration, Item Master, Preventive Maintenance, Inventory, Domain related issue • Thorough implementation, support knowledge of Bombardier Transportation Maximo version 4, 6, 7.1 and 7.6. • Having experience in Maximo Implementation, L2 and L3 support, and deployment activities • Having experience in Incident Management, Problem management, Change management, Service Request, and other applications. • Delivering 100% effectiveness in resolving ticket by ensuring compliance with client Service Level Agreements (SLAs) • Developing Conditional Queries/Reports to verify the desired results. • Worked on various formal and informal production reports. • Created the template for maintaining the application maintenance activities. • Worked in many configuration management applications for asset management related activities for future implementation. • Working in 24*7 support. When we rebuilt something internally, the technician will bring the new assembly in store, grab the Inventory Card and he will report the return in store against the rebuilt Work order. Objectives: • Created a card stock report in order to match the existing Inventory Card tool developed by Systems. • Increase reporting of consumption • Redefine the process of cycle count (80% efficiency in Systems) • The report will be based on inventory information and will introduce the notion of real time to increase precision BTRAMR0001SBB.rptdesign (Report Change): • The report BTRAMR0001SBB was developed for the European project. It is based on the BTRAMR0001MLM report and currently uses only launch option 2 and 3 of the BTRAMR0001MLM report. The client requested to have option 1 (type=1) of the BTRAMR0001MLM implemented in the BTRAMR0001SBB report as well as the translation of the labels from French to English. Objectives: • To have define the type=1, report definition for BTRAMR0001SBB • To have the labels translated from French to English BTRAMR0002.rptdesign (Systems Purchase Requisition Report): • The current PR report does not have bar-coding feature and is formatted too small. This is an operational report; it will be used in real time. • Have a common and standardized PR report across all Systems services sites with the support of bar-coding Incident Management Solution report: • The report displays the overall ticket progress. It shows count of tickets raised and assigned to both Infosys and Client queue. We can view the total no. of tickets raised for various application groups such as Maximo, Kronos and BIEM. It also further categories the ticket count based on ticket priority and the status. This helps in analyzing the data from ticketing tool. • There might be cases where different teams work on the tickets raised. This reports helps to analyses the team wise ticket count. We can there by monitor the performance of various teams. • This report displays the number of Incidents and Service Requests logged in each month. Also it shows total tickets (Incidents + Service requests) logged in each month. • This Report shows the number of tickets logged per country and it has been grouped month wise for various application groups such as Maximo, Kronos and BIEM within a date range. Vend_Reported_hrs. rptdesign (Vendor Reported Hours): • This report will fetch the details of vendor type labor working hours for each WOs. Role: Quality Anchor • Working as Quality Anchor for my team, which involves creating defect prevention analysis, tracking all the works and auditing for quality • Providing Statistics about the monthly activities done by the team • From defect prevent analysis focus on specific topic and conducting brainstorming session with team to avoid the defects • Responsible for gathering the requirements from Client and participate in Client Conferences. • Divide the requirements into various sprints based on the velocity. • Distribute the requirements to the team and monitor the development progress and provide clarification on the technical/functional requirements. • Mentor for the new members joining the team. Other Job Related Activities: • Successfully Completed Training in Design Thinking course and Kronos tool which keeps tracks on Work force management . ("Girish Acharya Technical Architect & Sr. Software Engineer Pune, Maharashtra - Email me on Indeed: [indeed.com/r/Girish-Acharya/6757f94ee9f4ec23](https://www.indeed.com/r/Girish-Acharya/6757f94ee9f4ec23) I would like to describe myself as a hard-core software engineer and technical architect passionate for technology and someone who loves to take challenges head-on. I have been using combined engineering principles wherein I was responsible for designing, developing, testing, deploying and monitoring highly scalable distributed applications and services. While I have always been working using Microsoft technologies, I got chance to work for Microsoft in as a full-time employee last year. My focus as part of this role was as a Dev Ops/Site Reliability Engineer. The main requirement of this role was to keep-lights-on in all data centers for Windows Developer Center. While Service Engineering aspect was the main requirement, I used my technical architect and software tools for inside-out and outside-in monitoring and telemetry. As a technical architect, I have worked in Accenture for about 7+ years. My role @ Microsoft account was to demonstrate technical leadership, design technical architecture, propose and introduce standard design and architectural patterns and practices, incorporate new requirements and feedbacks from client and execute multiple quick prototypes. As part of this role – I architected Microsoft IT's (MSIT) biggest Platform As A Service (PaaS) solution back in the days. I have executed multiple client facing projects wherein I was responsible for designing, architecting the compute, storage, application and deployment architecture. I have experience in designing and architecting systems for Business Continuity and Disaster Recovery (BCP/ DR strategies). I have designed and architected solutions for "Testing in production". I have experience in designing and architecting for extremely high scale (~ 3 billion requests/day). I have designed and implemented auto healing, smooth traffic routing and eventual consistency in multiple client facing projects. I am in the Information Technology industry since 2001 working for various software organizations in India for 4 years till I joined Accenture in 2006. I came to USA in 2010 and was working as consultant for Microsoft. I joined Microsoft in May 2015 as a full-time employee. I earned my Electronics Engineering degree in year 2000, Diploma in Advance Computing degree in year 2001 and completed Microsoft Certified Professional Developer and Enterprise Architect certification (MCP DEA) in year 2007. I am also Microsoft Azure Certified Developer and Architect. I am frequent community contributor. I blog at <http://girishthegeek.wordpress.com/> I have worked and published an asset called Framework for Ops Team considering Windows Azure and it was very well received by the clients and appreciated by the managers. I wrote a white paper related to AppFabric Service Bus which got published in MSDN. Willing to relocate: Anywhere <https://www.indeed.com/r/Girish-Acharya/6757f94ee9f4ec23?isid=rex-download&ikw=download-top&co=IN>

WORK EXPERIENCE Technical Architect Accenture Services - Pune, Maharashtra Software Engineer 2 Microsoft - Redmond - June 2016 to February 2017 Engagement and monetization (Microsoft – Universal Store/Windows Developer Center) June 2016– Recently

- Technologies used: Microsoft Azure, C#, SQL, PowerShell, App Insights, Azure Data Factory, Redis Cache, API Management Gateway, Azure App Services, Akamai, Azure CDNs, Azure Traffic Manager, Automated Unit Testing, Web Testing, Coded Unit Tests, Performance Testing etc.
- Tools – SpecFlow, JMeter, Junit, NUNit, MoQ, Fluent Assertions, VSTS, GIT, Microsoft Test Manager, Continuous Integration and deployment, maintaining build definitions
- Roles Played:
 - o Technical architect
 - o Designing and architecting for compute, storage, application, security and deployment architecture
 - o Designing and architecting for Business Continuity and Disaster Recovery (BCP DR)
 - o Designing and architecting for the Testing In Production (TIP)
 - o Designing and architecting for auto healing and auto scaling pattern
 - o Designing and developing for monitoring
 - o Design and develop inside out and outside in monitoring and logging
 - o Design and develop synthetic web tests
 - o Design and develop watchdogs
 - o Design and develop the global traffic management using Akamai
 - o Keeping lights on for the services in all data centers
 - o Firefighting drills and actual firefighting
 - o Live site issue tracking, management, coordination and resolving
 - o Capacity monitoring and management
 - o Code reviews
 - o Implemented the security architecture

EDUCATION Bachelor of Engineering in Microsoft C-DAC

SKILLS Azure (8 years), Asp.Net (8 years), C# (9 years), Web API (6 years), Sql (6 years), Technical Architect (5 years), Automation Testing (5 years)

LINKS <http://girishthegeek.wordpress.com/> <https://www.linkedin.com/in/girishazure>

CERTIFICATIONS/LICENSES Microsoft Certified Professional Developer Microsoft Certified Professional Developer Microsoft Certified Enterprise Architect

ADDITIONAL INFORMATION Technical Expertise *Technical Architecture, Microsoft Azure Platform, Microsoft .NET Platform, C#, ASP.NET* * Designing/Architecting/Building/Testing/Deploying apps/APIs using Windows Azure, SQL Azure, Azure Storage, REST/WCF, AppFabric Cache, Service Bus, Topic and Subscription, Access Control Services from last 7 years. * Azure Application Architecture: Web Role, Worker Role

e, VM Role, admin mode, start-up tasks integrating with on premise services using App Fabric Service Bus * Azure Security Architecture: Web Role security using SSL, WCF Security using certificates, Data Encryption using certificates, Authentication using ADFS/STS, Single sign on using ACS. Participated in ACE reviews, and provisioned related documentation/code * Azure Operations Architecture: Logging and monitoring using Windows Azure Diagnostics, integration with AVICode, SCOM, disaster recovering and business continuity planning and implementation, automated builds and deployments. * Azure Data Architecture: Understands SQL Azure, Windows Azure Storage (Tables, Blobs, Queues), Document DB, SQL Azure Data Sync, SQL Azure Federation etc. * Deployment Architecture : Continuous integration and deployment. Auto Build, Deployment using Service Management APIs and PowerShell cmdlets * Akamai - design and implement traffic management, caching using Akamai * Azure traffic manager, CDNs, Azure Data Factory, Auto Scaling * Deployment automation and synthetic monitoring using application insights * Developing end to end APIs and applications using ASP.NET Web Forms, ASP.NET MVC, Web API * Performance Testing: Performance, scalability testing using Visual Studio * Automated Testing: Automated Unit Testing, Web Testing, Coded Unit Tests, Performance Testing etc. Tools - SpecFlow, Jmeter, Junit, NUNit, MoQ, Fluent Assertions, VSTS, GIT * Big Data: Architected and developed a big solution using Windows Azure HD Insight, Hive queries <http://girishthegeek.wordpress.com/> <https://www.linkedin.com/in/girishazure> Projects Undertaken Engagement and monetization (Microsoft - Universal Store/Windows Developer Center) June 2016- Recently * Technologies used: Microsoft Azure, C#, SQL, PowerShell, App Insights, Azure Data Factory, Redis Cache, API Management Gateway, Azure App Services, Akamai, Azure CDNs, Azure Traffic Manager, Automated Unit Testing, Web Testing, Coded Unit Tests, Performance Testing etc. Tools - SpecFlow, JMeter, Junit, NUNit, MoQ, Fluent Assertions, VSTS, GIT, Microsoft Test Manager, Continuous Integration and deployment, maintaining build definitions * Roles Played: ◦ Technical architect ◦ Designing and architecting for compute, storage, application, security and deployment architecture ◦ Designing and architecting for Business Continuity and Disaster Recovery (BCP DR) ◦ Designing and architecting for the Testing In Production (TIP) ◦ Designing and architecting for auto healing and auto scaling pattern ◦ Designing and developing for monitoring * Design and develop inside out and outside in monitoring and logging * Design and develop synthetic web tests * Design and develop watchdogs ◦ Design and develop the global traffic management using Akamai ◦ Keeping lights on for the services in all data centers ◦ Firefighting drills and actual firefighting ◦ Live site issue tracking, management, coordination and resolving ◦ Capacity monitoring and management ◦ Code reviews ◦ Implemented the security architecture Channel inclusion Services - (CIS) Client: Microsoft Corporation / Group: Devices and Studios (formerly known as IEB) Sep 2012- June 2015 Synopsis: CIS is bunch of REST, SOAP services exposed to around 250+ partners dealing with end-to-end retail workflow for around 2 million transactions/day. Microsoft uses these services to distribute the digital goods (Windows, Office and so on.) . It also takes care of the brick and mortar scenario where in customers walk into the shop to buy Microsoft products & * Technologies used: ◦ Windows Azure - Web Roles, Worker Roles, ASP.NET Web API, ASP.NET MVC and Web Forms, WCF, Service Bus, Azure Storage ◦ SQL Azure, HD Insight, Azure Scheduler ◦ Entity Framework ◦ MOQ, SpecFlow, NUNit, JMeter, RhinoMock * Roles Played: ◦ Automated unit, performance, integration testing, synthetic testing, data testing, monitoring and improving code coverage, building test case and bugs /defects reports ◦ Continuous Integration and deployment, maintaining build definitions ◦ Designing and architecting service/api specifications and contracts ◦ Designing and architecting for high scale ◦ Designing and architecting for compute, storage, application, security and deployment architecture ◦ Designing and architecting for Business Continuity and Disaster Recovery (BCP DR) ◦ Implementing (developing, testing and monitoring) highly scalable, distributed services ◦ Senior developer consultant responsible to work independently with the clients in designing contracts, defining user stories, implementing them ◦ Write, execute the BVTs, Unit tests and functional tests, monitoring and improving code coverage ◦ Building test plans, test strategy ◦ Code reviews Involved in Application, Security, Operations and Data architecture Microsoft Store - Commerce Broker Services (CBS) Client: Microsoft Corporation / Group: Devices and Studios (formerly known as IEB) Nov 2011 - Till Sep 2012 Synopsis: CBS is Service Oriented middle tier component which is responsible for communicating with Microsoft Store front end web site and down-stream systems (SAP, Fulfillment, Payment Gateway etc.) & * Technologies used: ◦ Windows Azure Queues, Service Bus Topics and subscriptions ◦ WCF ◦ WCF Workflow Services ◦ Entity Framework ◦ MOQ, SpecFlow, NUNit, JMeter * Roles Played: ◦ Building test plans, test cases, bugs reports, test strategy ◦ Continuous Integration and deployment, maintaining build definitions ◦ Automated unit, performance, integration testing, synthetic testing, data testing ◦ Senior consultant responsible to work independently with the clients in designing contracts, defining user stories, implementing them ◦ Write, execute the BVTs, Unit tests and functional tests ◦ Code reviews ◦ Involved in Application, Security, Operations and Data architecture BCWeb Wrap Migration to Windows Azure Client: Microsoft Corporation / Group: VLI T Jan 2011 - Oct 2011 Case Study Featured on TechNet Synopsis: BCWeb is a Windows Azure ASP.NET Web

Role application; authenticated against STS using Federation services that provide a set of Web forms that help capture price exception details, information on business case for doing discounts on price lists, and helps calculate percentage of discount. It uses the ASP.NET connector and custom Web services to pull real-time price information from SAP, and provides sales executives with a light front-end to SAP. BCWeb helps simulate pricing discounts, manage business rules, customize routing and approval workflows, and update the LOB data stored in SAP. One of the major goals of this system is to improve field productivity by simplifying the process and removing training requirements for complex back-end systems, in this case SAP. BCWeb integrates different promotion types into a simplified Web-application. It also allows users to specify business rules using Excel 2007 files and to get notifications in Outlook 2007. Additional goals of this system include:

- Reduce revenue leakage by having a business case documented for each promotion field.
- Obtain visibility decisions and understand who required a discount and why.
- Understand promotion effectiveness and ensure the field is making informed decisions.
- Provide a configurable set of files to easily change empowerment guidelines by having a single master data of workflow routing and approvals.
- Specific business process in price-execution domain, however, pattern addresses larger solutions space.

*** Roles Played:**

- Responsible for technical architecture
- Involved in Application, Security, Operations and Data architecture
- Work Estimation and migration assessment

Key Contributor as Windows Azure Developer, Analyst

Origin Digital Cloud Coder Client: Origin Digital Jan 2010 - May 2010

Synopsis: Origin Digital, a video application service provider that aggregates, transcodes, manages and distributes the digital media files. As part of the business need, they wanted to increase transcoding throughput without increasing capital expense. As part of the solutioning, the onshore technical architect along with IDC development team put together an approach that allowed - Process intensive digital video transcoding service to-run-on Azure Platform leveraging cloud's real-time scalability and compute capacity. Infrastructure as a Service (IaaS) offering. - Secure all business sensitive information by using On-premise data storage through Azure - An administration module to support Platform as a Service (PaaS) was developed. The team completed the whole migration activity in 6 weeks using Agile methodology and managed to showcase it successfully in Microsoft PDC 2009 at Los Angeles. The solution resulted in reducing the compute costs by half.

*** Technologies used:** ASP.Net 3.5, SQL Azure, Windows Azure, Azure Blob/Table Storage, WCF etc.

*** Roles Played:**

- Over all Application and Data architecture
- Designing Auto Scaling Engine (Rules Based)
- Leading a team to do daily integration test on cloud
- Designing classes/database/user interface.
- Coordinating deployment procedure on cloud.

Claims FNOL Client: StateFarm May 2009 - Aug 2009

Synopsis: FNOL (First Notice of Loss) is the front end for Insurance Company employees to log the insurance claims. It implements AICS framework which is exposed for other companies to use on Azure as SaaS/multi-tenant (Software-as-a-service) service.

*** Technologies used:** ASP.Net 3.5, SQL Azure, Windows Azure, Azure Blob/Table Storage, WCF etc.

*** Roles Played:**

- Overall Application Architect
- Security and database architect

Postal Return Solutions Client: USPS Oct 2009 - Nov 2009

Vision - Electronic Recycling Return Solution to companies which would like to offer a recycling capability on their web sites (like- HP, Dell etc.) - **Merchandise Return Solutions** for large e-Commerce customers (like- Landsend, Amazon etc) - **Parcel Return Solutions** to its business partners (like-UPS, FedEx etc.), who would like to leverage USPS provided return solutions.

Approach - Using Silverlight, create rich web-based user interface for calling Electronic Merchandise Return Service Web Tools. - UI should facilitate printing and emailing EMR Labels.

Scope - Create shipping return labels using USPS's 'Electronic Merchandise Return Solution' for key partners (like Dell, WM) that participate in product recycling programs. It involves utilizing USPS public APIs; expand functionality of existing application to create this shipping capability on Windows Azure Platform.

*** Technologies used:** Silverlight, SQL Azure, Windows Azure, Azure Blob/Table Storage, WCF etc.

*** Roles Played:**

- Delivery Lead
- Overall Application Architect

What's new @ (SaaS, Multi-Tenant mobile application) Client: Starbucks, Coca Cola

Vision - Content Admin (Publisher) prepares and distributes the content to the employees of the organization. - Employees by using the mobile based application forward the content on social networking sites like Twitter, Facebook etc. - Once the users within the network of the employees view/share the content forward, using analytics capture the view/share count. - Branding done using dynamically loading CSSs.

Approach - Using ASP.Net 3.5, create rich web-based user interface for mobile application. - Using ASP.Net 3.5, create rich web-based user interface for publishers. - Use Google, Facebook, Bit Ly and Twitter analytics to capture the view/share counts.

*** Technologies used:** ASP.Net 3.5, SQL Azure, Windows Azure, Azure Blob/Table Storage, WCF, Google Analytics, Facebook APIs, Twitter APIS etc.

*** Roles Played:**

- Delivery Lead
- Offshore Technical Architect

GCP Tracker Client: Accenture Internal June 2008-Dec 2008

Synopsis: GCP (Global career program) is a workflow based tool intended to track employees going on onsite assignment for more than 6 months. The GCP process starts when DU Lead nominates an employee for onsite assignment and ends when employee comes back to home location. It caters to all GCP processes involved at home country as well as processes involved at Host country.

*** Technologies used:** ASP.Net 2.0, SQL 2005, Windows Workflow Foundation

* Roles Played: ◦ Offshore Technical Architect, Dev Lead ◦ Designing solution with the help of Senior Architects. ◦ Designing integration interface ◦ Was responsible for drawing/ implementing complex workflow using WF. ◦ Leading a team responsible for implementing Change Requests. ◦ Coordinating deployment procedures. Abacus DSM Client: Accenture Internal June 2006-June 2008 Synopsis: Abacus Demand Supply Management was developed for Accenture HR/Scheduling/Sales teams by CIO (Chief Information Office) * Technologies used: ASP.Net, SQL 2005

* Roles Played: ◦ Technical Architect, Dev Lead ◦ Leading a team responsible for implementing Change Requests. ◦ Talking/calling/interviewing clients to gather requirements. Documenting it. Getting sign-off on it. ◦ Coordinating Internal, User Acceptance, Integration and Performance Testing. ◦ Leading Production Support team. ◦ Build Manager. CFE Client: Bombay Stock Exchange October 2005 - June 2006 Synopsis: CFE system (Common Front End System) is a trading platform for member (and traders of members) of BSE to trade in Multi exchange, Multi segments for trader authentication developed by CMC Ltd. It is designed to facilitate Members with centralized access rights management (has inbuilt Risk Management Server) and enable member to have a centralized Client-level Risk Management at the Broker Office, wherein the risk for a client will be checked across all traders associated with the broker for trading carried out in all segments and on any of the exchanges, centrally at one location. * Technologies used: Windows Forms (using C#), MS SQL

* Roles Played: Dev Lead, Technical Architect, Requirements gathering and analysis, Design, CMM-i documentation, writing BRS, FSD, and Program Specs etc. Bond Clinician Client: Bond Technologies November 2004 - October 2005 Synopsis: Clinician is a complete healthcare solution for any clinic and hospital. It has got interface both for Patients and doctors/physician. It has the capability of generating all sorts of lab reports etc and has a full-fledged Document Management System wherein clinics can maintain and scan all documents and reports in the scanned format. It also uses the third-party interface for Health Insurance. * Technologies used: ASP.Net web forms (using VB.Net), MS SQL, MSMQ

* Roles Played: Developer, Database Design, Implementation and Testing", {'entities': [(19383, 19402, 'Designation'), (18315, 18334, 'Designation'), (17772, 17791, 'Designation'), (17215, 17234, 'Designation'), (14240, 14249, 'Companies worked at'), (11438, 11447, 'Companies worked at'), (10611, 10620, 'Companies worked at'), (10409, 10418, 'Companies worked at'), (10352, 10361, 'Companies worked at'), (9073, 9082, 'Companies worked at'), (8883, 8892, 'Companies worked at'), (8629, 8638, 'Companies worked at'), (7621, 7630, 'Companies worked at'), (7294, 7303, 'Companies worked at'), (7198, 7207, 'Companies worked at'), (5217, 5226, 'Companies worked at'), (5191, 5200, 'Companies worked at'), (5167, 5186, 'Designation'), (5079, 5088, 'Companies worked at'), (5035, 5044, 'Companies worked at'), (4991, 5000, 'Companies worked at'), (4736, 4880, 'Skills'), (4719, 4724, 'College Name'), (4708, 4717, 'Companies worked at'), (4681, 4717, 'Degree'), (3692, 3701, 'Companies worked at'), (3365, 3374, 'Companies worked at'), (3268, 3277, 'Companies worked at'), (3187, 3196, 'Companies worked at'), (3166, 3185, 'Designation'), (3147, 3151, 'Location'), (3125, 3143, 'Companies worked at'), (3104, 3123, 'Designation'), (2999, 3043, 'Email Address'), (2561, 2570, 'Companies worked at'), (2446, 2455, 'Companies worked at'), (2279, 2288, 'Companies worked at'), (2259, 2268, 'Companies worked at'), (1371, 1380, 'Companies worked at'), (1070, 1079, 'Companies worked at'), (593, 602, 'Companies worked at'), (544, 553, 'Companies worked at'), (100, 144, 'Email Address'), (60, 64, 'Location'), (15, 58, 'Designation'), (15, 34, 'Designation'), (0, 14, 'Name')]]})

("Asha Subbaiah (Microsoft Partner Readiness Operations Project Manager (APAC) - Microsoft GPS Bangalore, Karnataka - Email me on Indeed: indeed.com/r/Asha-Subbaiah/f7489ca1bec4570b WORK EXPERIENCE (Microsoft Partner Readiness Operations Project Manager (APAC) Microsoft GPS - August 2014 to Present Worked closely with the APAC PB&D teams / responsible for coordinating and tracking impact, effectiveness and progress of our readiness activities with focus on driving efficiencies in various programs in Channel Readiness and Sure step and partner closely with Channel Readiness Manager and (PCMM - SMB) from APAC SMS&P. ("Sanand Pal SQL and MSBI Developer with experience in Azure SQL and Data Lake store. Hyderabad, Telangana - Email me on Indeed: [indeed.com/r/Sanand-Pal/5c99c42c3400737c](https://www.indeed.com/r/Sanand-Pal/5c99c42c3400737c) I intend to establish myself as Software Engineer / architect with an integrated business solution provider through a long time commitment, contributing to the company's growth and in turn ensuring personal growth within the organization. I believe that my technical, functional and communication skills will enable me in facing the challenging career ahead. Willing to relocate to: Kolkata, West Bengal - hyderabad, Telangana WORK EXPERIENCE Assistant Consultant TCS • Expertise in SQL Server(2008 R2, 2012, 2014) development, Microsoft BI (SSIS) • Experience with Microsoft BI (SSAS, SSRS), ASP.NET, VSTO, C#. • Experience in all the phases of Software Development Life Cycle (SDLC). • Experience in Business Requirements Analysis, meeting customer expectations. • Have had the opportunity to handle and work in multiple projects at a time. • Experience in working both independently and in a team-oriented, collaborative environment. • Excellent written and verbal communication skills, good analytical and problem solving skills. SQL and SSIS developer/ Sustain resource MICROSOFT - Hyderabad, Telangana - August 2011 to June 2016 Project US EPG Forecast Workbook (FWB) application is designed to support the US Enterprise Partner Group (US EPG) in producing and maintaining the monthly US sales forecast. It is a transactional database combined with Microsoft Office Excel functionality that enables end users to interact with the USNAForecast database. Typically, an ATU manager will connect to the corporate network and download data from the forecast database, which creates an offline forecast workbook. This data can then be accessed offline, modelled, and changes to certain data fields are subsequently uploaded back to the forecast database through a CorpNet connection. These changes are then stored in the online database and subsequently loaded back into upstream systems. Responsibilities • Involved in the Technical discussions/Sessions and efforts estimations and reviews. • Involved in analysis of the Bugs/ Issues/defects/CRs. • Involved in change requests on VSTO Excel application. • Involved in design of database, tables and stored procedures. • Developed SQL Server Integration Services packages for ETL process. • Unit testing and bug fixing of the code. <https://www.indeed.com/r/Sanand-Pal/5c99c42c3400737c?isid=rex-download&ikw=download-top&co=IN> • Actively solved the issues that raised during the integration cycle • Performed build verification and Smoke tested all the defects raised before giving a delivery. • Prepared and updated FS, TS and deployment guides. • Provided knowledge sharing to Users • Provided post implementation support • Promptly check in the final Code in VSTF. Experience in Logging, Error handling, configuration, deployment, troubleshooting and performance tuning of SSIS Packages. o Reporting: Experience in all the Latest Reporting Tools like Tableau Data visualization, Power BI and SSRS 2012. Act as a Point of Contact in Data Interoperability, Analytics and BI and Product

on Support issue resolution. Experience in Developing Performance Dashboards, Score cards, Metrics, what if analysis, Prompts, Drills. Reports/Dashboards for all the functional areas including Finance, Pricing, Purchasing and Sales/Marketing. Willing to relocate: Anywhere **WORK EXPERIENCE** Software Engineer Microsoft - hyderabad, Telangana - December 2015 to Present

1. Microsoft Rewards Live dashboards: Description: - Microsoft rewards is loyalty program that rewards Users for browsing and shopping online. Microsoft Rewards members can earn points when searching with Bing, browsing with Microsoft Edge and making purchases at the Xbox Store, the Windows Store and the Microsoft Store. Plus, user can pick up bonus points for taking daily quizzes and tours on the Microsoft rewards website. Rewards live dashboards gives a live picture of usage world-wide and by markets like US, Canada, Australia, new user registration count, top/bottom performing rewards offers, orders stats and weekly trends of user activities, orders and new user registrations. the PBI tiles gets refreshed in different frequencies starting from 5 seconds to 30 minutes. Technology/Tools used • Event hub, stream analytics and Power BI. Responsibilities • Created stream analytics jobs to process event hub data <https://www.indeed.com/r/Dushyant-Bhatt/140749dace5dc26f?isid=rex-download&ikw=download-top&co=IN> <https://www.indeed.com/r/Dushyant-Bhatt/140749dace5dc26f?isid=rex-download&ikw=download-top&co=IN> • Created Power BI live dashboard to show live usage traffic, weekly trends, cards, charts to show top/bottom 10 offers and usage metrics.
2. Microsoft Rewards Data Insights: Description: - Microsoft rewards is loyalty program that rewards Users for browsing and shopping online. Microsoft Rewards members can earn points when searching with Bing, browsing with Microsoft Edge and making purchases at the Xbox Store, the Windows Store and the Microsoft Store. Plus, user can pick up bonus points for taking daily quizzes and tours on the Microsoft rewards website. Rewards data insights is data analytics and reporting platform, processes 20 million users daily activities and redemption across different markets like US, Canada, Australia. Technology/Tools used • Cosmos (Microsoft big-data platform), c#, X-flow job monitoring, Power BI. Responsibilities • Created big data scripts in cosmos • C# data extractors, processors and reducers for data transformation • Power BI dashboards
3. End to end tracking Tool: Description: - This is real-time Tracking tool to track different business transactions like order, order response, functional acknowledgement, invoice flowing inside ICOE. It gives flexibility to customers to track their transactions and appropriate error information in-case of any failure. Based on resource based access control the tool gives flexibility to end user to perform different actions like view transactions, search based on different filter criteria and view and download actual message payload. End to end tracking tool stitches all the business transaction like order to cash flow and connects different hops inside ICOE like gateway, routing server, Processing server. It also connects different systems like ICOE, partner end point and SAP. Technology/Tools used • Azure Document db, Azure web job and Web APP, RBAC, Angular JS. Responsibilities • Document dB stored procedures. • Web job to process event hub data and populate Document db • Web App API. • Stream analytics job to transform data • Power BI reports
4. Biztrack Tracking Tool: Description: - This is real-time Tracking tool to track different business transactions like order, order response, functional acknowledgement, invoice flowing inside ICOE. It gives flexibility to customers to track their transactions and appropriate error information in-case of any failure. Based on resource based access control the tool gives flexibility to end user to perform different actions like view transactions, search based on different filter criteria and view and download actual message payload. Technology/Tools used • SQL server 2014, SSIS, .net API, Angular JS. Responsibilities • ETL solution to transform business transactions data stored in Biztalk tables. • SQL azure tables, stored procedures, User defined functions. • Performance tuning. • Web API enhancements.

EDUCATION Saurashtra University - Morbi, Gujarat 2007 **SKILLS** problem solving (Less than 1 year), project lifecycle (Less than 1 year), project manager (Less than 1 year), technical assistance. (Less than 1 year) **ADDITIONAL INFORMATION** Professional Skills • Excellent analytical, problem solving, communication, knowledge transfer and interpersonal skills with ability to interact with individuals at all the levels • Quick learner and maintains cordial relationship with project manager and team members and good performer both in team and independent job environments • Positive attitude towards superiors & peers • Supervised junior developers throughout project lifecycle and provided technical assistance.', {'entities': [(5893, 6043, 'Skills'), (5838, 5859, 'College Name'), (3730, 3739, 'Companies worked at'), (3495, 3504, 'Companies worked at'), (3400, 3409, 'Companies worked at'), (3319, 3328, 'Companies worked at'), (3237, 3246, 'Companies worked at'), (3147, 3156, 'Companies worked at'), (3099, 3108, 'Companies worked at'), (2235, 2244, 'Companies worked at'), (2140, 2149, 'Companies worked at'), (2059, 2068, 'Companies worked at'), (1977, 1986, 'Companies worked at'), (1887, 1896, 'Companies worked at'), (1837, 1846, 'Companies worked at'), (1772, 1781, 'Companies worked at'), (1753, 1771, 'Designation'), (729, 738, 'Companies worked at'), (98, 143, 'Email Address'), (37, 46, 'Location'), (0, 14, 'Name')]]}

/97ead9542c575355 □ To work in a progressive organization where I can enhance my skills and learning to contribute to the success of the organization. **WORK EXPERIENCE** Technical support engineer Microsoft Position: TECHNICAL SUPPORT ENGINEER Company: Microsoft Corporation - Microsoft India Global Technical Support Center (Microsoft IGTSC), Bangalore Years of Experience: 2 Years and 4 Months Responsibilities □ Represent Microsoft and communicate with corporate customers via telephone, written correspondence, or electronic service regarding technically complex escalated problems identified in Microsoft software products, and manage relationships with those customers. □ Manage not only the technically complex problems, but also politically charged situations requiring the highest level of customer skill. □ Receive technically complex, critical or politically hot customer issues, and maintain ownership of issue until resolved completely. □ Solve highly complex problems, involving broad, in-depth product knowledge or in-depth product specialty. □ Use trace analysis, and other sophisticated tools to analyze problems and develop solutions to meet customer needs. □ Lead triage meetings to share knowledge with other engineers and develop customer solutions efficiently. □ Act as technical lead, mentor, and model for a team of engineers; provide direction to others, review solutions and articles, mentoring existing & aspiring Engineers. □ Write technical articles for knowledge base. □ Consult, collaborate and take escalations when necessary. <https://www.indeed.com/r/Soumya-Balan/97ead9542c575355?isid=rex-download&ikw=download-top&co=IN> <https://www.indeed.com/r/Soumya-Balan/97ead9542c575355?isid=rex-download&ikw=download-top&co=IN> □ Maintain working knowledge of pre-release products and take ownership for improvement in key technical areas. □ Manage customer escalations and recognize when to solicit additional help. Participate in technical discussions and engage with product team if required to resolve issues and represent customer segments. **Exchange Server Knowledge** □ Exchange Server 2007 □ Exchange Server 2010 □ Exchange Server 2013 □ O365 **UG PROJECT TITLE: Memory Bounded Anytime Heuristic Search A* Algorithm** □ This Project presents a heuristic-search algorithm called Memory-bounded Anytime Window A*(MAWA*), which is complete, anytime, and memory bounded. MAWA* uses the window- bounded anytime-search methodology of AWA* as the basic framework and combines it with the memory-bounded A* -like approach to handle restricted memory situations. Simple and efficient versions of MAWA* targeted for tree search have also been presented. Experimental results of the sliding-tile puzzle problem and the traveling-salesman problem show the significant advantages of the proposed algorithm over existing methods. **Technical and Co-Curricular activities** □ Star Performer in Microsoft IGTSC in 2014. □ Paper Presentations on Applications of Robotics in INOX 2K12. □ Attended a Three-Day workshop on C and C++ Programming and Aliasing. □ Attended a One-Day workshop on Java and Hardware Workshop at VECW □ Paper presentation 4G Technologies, Cloud Computing, Heuristic Algorithms and Applications, Open Source Software. □ Multimedia presentations on Artificial Intelligence, 6th Sense, and Robotics. □ Completed training of OCA (9i, 10g) from Oracle University. □ Attended SPARK training program in Infosys Mysore. □ Attended System Hardware Training program at HCL, Pondicherry. **EDUCATION** BE in Computer Science and Engineering Vivekananda Engineering College for Women - Chennai, Tamil Nadu 2013 BTEC HNC in Aviation in Hospitality and Travel Management Frankfinn Institute of Air hostess Training - Calicut, Kerala 2008 State Board 2007 **SKILLS** Linux (Less than 1 year), Microsoft Office (Less than 1 year), MS OFFICE (Less than 1 year), problem solving (Less than 1 year) **ADDITIONAL INFORMATION** Skill Set □ Excellent communication and interpersonal skills. □ Proficient in Computer Applications -Microsoft Office Windows (Windows 2007, XP, 8, 8.1 and Windows 10), Linux, Fedora. □ Strong analytical and problem solving skills. □ Ability in managing a team of professionals and enjoy being in a team.', {'entities': [(3913, 4370, 'Skills'), (3880, 3884, 'Graduation Year'), (3815, 3859, 'College Name'), (3756, 3814, 'Degree'), (3750, 3754, 'Graduation Year'), (3684, 3726, 'College Name'), (3644, 3683, 'Degree'), (2284, 2288, 'Graduation Year'), (78, 122, 'Email Address'), (25, 40, 'Location'), (13, 23, 'Designation'), (0, 12, 'Name')]]})

Mentoring the team Project 02: VSM IPsec for ASR9K Duration: From Date: Feb 2013 to Oct 2014 Designation: Senior Technical Lead Client: Cisco Support for IPsec on ASR9K routers. VSM Service module is extended to support IPsec Service on ASR9K. In order to achieve the Time to market, in the first phase IPsec management, control and data plane are not integrated with IOS-XR. VSM card while plugged inside ASR9K chassis, will provide the IPsec functionality. From an ingress LC, traffic requiring IPsec functionality (encryption or decryption) will be sent to VSM card. Upon completing the crypto operation, traffic will be forwarded to the destination egress LC to be sent out of ASR9K system. Role: 1. Initial Sessions for the team members on overall architecture 2. Coordinating with team members and technical help to the team 3. Initial investigation using Intel DPDK compilation, launch VMs etc. 4. Initial investigation on High Availability Design 5. Design/Development of Keep alive functionality between Control plane and Data plane agents 6. Design/Development of integrating CDP in Control Plane 7. Design/Development of having CDP in the Linux Data plane Prior Experience Outside Aricent Company worked for: INFOSYS LIMITED Duration: From Date: 03 Sep 2007 To Date: 2 Jan 2013 Designation: Technology Lead Product: MERS and ERS Routers Client: Avaya Project 01: Ethernet Routing Switch - North American OEM The Ethernet Routing Switch is a proven, tested, resilient intelligent network solution that scales, delivering hundreds of Gigabits per second and hundreds of millions of packets per second of performance to the core. This flexible switch reduces the complexity of network design, making it ideal for midsize-to-large enterprise campuses and data centers. Its switching architecture is based on Network Processing Units (NPU) This project aims at design, development and sustenance of Enterprise Routers. Responsibilities/Activities • Bug Fixing and crash analysis in area of Routing and system architecture • Trouble Shooting the live customer network to understand the issue provide work around and collect data • As Sustenance team member and lead resolved/supervised cri

tical customer and design issues. - Critical customer issues in Area of Vxworks Stack, SSH, STP device drivers, BGP protocol, MLT, LACP, CFM Some good issues solved in different areas of the product which are in memory are - Solving tftp hang issue in Vxworks Stack - Providing task delete hook for the graceful task deletion for SSH Hang issue - Solving BGP indirect neighbor issue by trouble shooting live customer network - Providing analysis and solution to a non-reproducible SSH hang issue - Providing analysis on inter-op issue with proprietary IO card with CISC O - Fix for CF card crash issue - Quick solution provided in RSP Code for handling traffic on STP blocked port for IP Traffic. - Provided design/technical inputs for feature development "Sys log Support through SSH Portforwarding" - Supervised feature "Federal IA Library" design and implementation • Maintain and setting up of scaled up stability network to verify the Stability of the product • Training and mentoring new personnel in the project • Review of Designs, Enhancements & Major Bug Fixes. -Provided Code /Design Review comments and testing guidance and testing scenarios. • Design Support to Product Test teams for newly developed features. • Design and Development of enhancements. • As a lead involved in tracking deliverables, estimation, status reporting (to the customer), productivity and quality tracking. • Additionally providing consultation to test team in their deliverables • Ensuring high quality of deliverables through reviews and defect prevention. Project 02: Metro Ethernet Routing Switch - North American OEM Responsibilities/Activities • Worked in the various capacities -Technical Lead, Designer, • Resolving Critical customer issues in quick turnaround time • Driving the sustenance team size of 10 by providing the technical assistance and necessary sessions and trainings in turn increase the productivity of the team • Conducting weekly bug-scrub meetings to ensure the work in track • One of the key code reviewers in the program to ensure the proper quality of the product delivered. • Defect analysis, Knowledge management are the other key responsibilities • Training and mentoring new personnel in the project. Company worked for: HUAWEI TECHNOLOGIES Duration: From Date: 07 Jun 2004 To Date: 18 May 2007 Designation: SOFTWARE ENGINEER Client: Huawei China Project 01: DOPRA Description of the project DOPRA is the platform for telecom products. It is a proprietary platform and has company internal customers. It has main two planes, system management and system service planes and several sub modules. I have successfully worked on the following modules. Module - MML INI Parser Tool MML is Configuration Tool used in communication equipments This Configuration Tool has set of default and user defined commands. INI Parsing tool is a tool which accepts MML Commands in certain grammar and generates Resource file and Binary File respectively which will be read by server to register the commands. Involved in the development, testing, verification of the module on windows. Module - Man Machine Language MML is a configuration tool widely used in communication equipments. It uses Client/Server architecture. MML server communicates with both the client and the APP in the equipment. It receives MML commands inputted by users from the client and relays it to APP to process it. After acquiring the processing result, the server generates a MML report and sends it back to the client. It interacts with other system modules. Connection Management, Authorization Management, Command Process, Data Synchronization, Event Notification, Command Parsing, LOG/ALARM Handling are some of the functions of MML Server. Involved in the development, defect fixing and verification of the module on windows, Linux and vxworks platforms Involved in several release activities. Module - Configuration Management Configuration Management Module is core module of System Management. Its main function is to define specifications for configuration management interface between the configuration tool layer and the application layer, and provide related configuration command communication mechanism. Any information that can be modified by the user/application and that affects the functionality of the application can be regarded as configurable data. All configuration commands can be sent to Configuration Management Module using a common interface type. Configuration Data Management Module is a supplementary optional component that can be loaded to provide a persistent storage (& retrieval) mechanism for applications' static configuration data. Involved in the defect fixing and feature enhancement of the module on windows, Linux and vxworks platforms Involved in several release activities. Module - TL1 Transaction Language 1 (TL1) is a widely used, "legacy", management protocol in telecommunications. It is a cross-vendor, cross-technology man-machine language, and is widely used to manage Synchronous Optical Networks (SONET) . It is defined for operation system/ network element (machine-to-machine) interfaces. TL1 corresponds to the User System Language (USL), which is the language for human-to machine interactions. It is used for managing network elements in a network. TL1 Module is an interface between an Application and Client. Client sends the TL1 Commands to perform some configuration operations in the Applications. TL1 module process the client text TL1 commands according to standard specification TL1 GR 831 and interacts with the Configuration management module and Convert Response messages back to TL1 Response messages Involved in development, verification and customer and release activities . I was a module lead for this project. Module - QX The Qx interface is a company proprietary application layer protocol between target and the GUI of NMS. By this protocol, NE can communicate with SCC (System Communication and Control) software in different operation system. Each command has defined format. Commands are given in b

inary form. Qx Module acts as an interface between the Client and Application. Involved in development, verification and customer and release activities. I was a module lead for this project. Role: Designer/Developer/ Reviewer/ Responsibility: Designing and coding various modules Involvement in peer review and overall review activities and project discussions Coordinating the development cycle Training team members and solving project related issues c onfiguration management of the project using Clear Case Duration: From June 2004 to Sep 2006 Hardware: X86, C PCI, ATCA Software: C++, C Project2: Wireless LAN - 802.11 MAC (Split AP Architecture) Description of the pr oject Wireless LAN 802.11 describes MAC and PHY. Wireless stations are connected to form a basic service area w hich is controlled by a base station called Access Point. Access Point is a special device which basically acts as a bri dge between wired and wireless media connected to a distributed system generally Ethernet. Several Access Points c an be connected to a distribution media to form an extended service set. In split AP architecture AP's connect to a c entral controller called Access Controller in short AC. AP has the minimal functionalities such as receiving the 802. 11 data from the radio and forwarding data and management frames to AC, Power management, Advertising beacon s, handling control frames. Management operations such as Association, Authentication, Handling frames, conversio n between [...] 802.3 will be done by AC. I was involved in the development of feature development, defect analysi s, testing activities in the CLI, Frame handling, Association and Beacon advertisement modules. Module: WLAN Su pport for WMM 802.11 E Qos Requirements WMM is a protocol designed by the Wi-Fi forum to provide quality of service to wireless traffic. This project basically deals with providing WLAN support for WMM module, this includ es handling Qos frames in the Uplink down link data flow, Priority mapping for Qos frames, Fragmentation and Rea ssembly of the Qos frames, Security Related modifications for Qos Frames, Power management of Qos stations etc. I was involved in the design, review, coding of the Uplink, Down link Data Flow, Fragmentation and Reassembly of the Qos frames. Role: Developer Responsibility: To design, and code the necessary changes. Design test scenarios for the design verification of the feature enhancements. Ensure proper quality of the product delivered. Smoke testin g of all the features in each release Performance testing and log record maintenance Configuration Management for f eature enhancement projects using Clear case tool Duration: From: Sep 2006 - May 2007 Hardware: Vxworks, Win dows Software: C Company worked for: ALBERTSONS INTERNATIONAL PRIVATE LIMITED Duration: From Date: 16 Jun 2000 To Date:29 Oct 2001 Designation: SOFTWARE ENGINEER Project Name Application Softwar e Development Description of the project Software for guest house, Fisheries Account management, Liquor wholes ale. restaurants Role: Designer/Developer/ Reviewer/ Customer Support Responsibility: Designing and coding abo ve mentioned projects independently Involvement in requirement collection, prototype building, installation and sup port Coordinating the development cycle Duration: From June 2000 to Oct 2001 Hardware: X86 Software: VB, C, MSACCESS Management Skill Set • Release Planning • Work assignment and Follow up • Preparation of weekly b ug scrub for customer and Conducting Weekly Bug scrub Meetings with the team • Monthly Billing • Monthly Mile stone Report Preparation • Monthly Metrics Report Preparation • Monthly OPS Review Report Preparation and Mee tings with customer • Weekly OPS Preparation and Meetings with customer • TL9K Audit Preparation • Quarterly D efect Prevention and Analysis Report Preparation • Monthly CM Audit • Provided Macro and VB scripting and CQ queries for button click report generation SRIDEVI RAO H', {'entities': [(2473, 2498, 'Designation'), (2030, 2037, ' Companies worked at'), (1978, 1985, 'Companies worked at'), (457, 1171, 'Skills'), (419, 448, 'College Name'), (393, 417, 'Degree'), (359, 370, 'College Name'), (334, 358, 'Degree'), (298, 305, 'Companies worked at'), (276, 297, 'Com panies worked at'), (249, 274, 'Designation'), (52, 92, 'Email Address'), (10, 19, 'Location'), (0, 9, 'Name')]]})

("Raktim Podder 6+ Exp in banking operations and credit assessment Pune, Maharashtra - Email me on Indeed: ind eed.com/r/Raktim-Podder/32472fc557546084 Willing to relocate: Anywhere WORK EXPERIENCE SME TCS Tata Consultancy Services: Project TELSTRA (AUSTRALIA) Sr Process Executive SME: Telecom Business Case Management. Technical support to the onsite engineers. Dealers support function. Emails regarding connection escal ations. Tech implementations in telecom. Looking after the day to day business production. =IN HSBC: UK onboarding and KYC Customer Relationship Management and on boarding: Setting up and checking KYC documents. National ID Address proofs Income proofs Addition security for additional credits. Credit scoring report from external credit rating agencies in UK. Calling the customer and informing the current status of the process. Asking for additional documentation if required. Interviewing the customer for understanding his/her portfolio. Uploading documents and creating profile in BMM and sending for approval. Liaising with branch and credit control for additional requirements and if needed execution of those requirements. Volume of production or volume of documentation forecasting based on the current sales and branch production: Liaising with branch to understand the volume. Liaising with sales to under the targets and performance ratio to determine the incoming CRM volume. Determining if there is a dip in CRM production or rise based on: Volume comparison and trend analysis reporting to the higher managements. Weekly/ Monthly / Quarterly dashboard creation. Daily volume trend analysis. Production and process reporting EOD. Technical Implementation support: Requirements specifications to the development team to improve the applications in the project. UAT user acceptance testing of new applications in the project and reporting the same to the IT team Sit with development to understand the reason behind the implementation and communicating the same to the FTE's Training provision on new applications to the FTE's Changes implementation if required to the development team. Online banking platform support: Helping the online banking team to implement the CRM online. Understanding the requirements of the management in regards to what they want and why they want to integrate the CRM into online banking. Meeting setup to understand requirements. Once the requirements have been framed we sit with the development team to provide them understanding of the CRM process and what is required by CRM that needs integration in the online banking platform. Providing support in every stage of website coding development: Communicating the scope and purpose of the website to the development teams. Helping with baseline setup. Providing data to the development team: What will be the content of the CRM tool in the website. How customers can access the tool online to complete their KYC. Illustration of documents required will be on the page or not. What kind of documents will be uploaded in the website. What kind of files will the website support. Where will it be stored after it gets uploaded. Where the files will be sent after it gets uploaded for approvals. How will the customer know of the status of the application process by automated email or by text or by both. What other links will be there on the online CRM tool which can be useful for the customer. What will the customer do if they are in confusion while uploading the documents for which a web chat can be introduced to provide support and direct contact with the executive. Understanding the size of the project and what resources are required to execute the project. Understanding the risk involved in executing the new codes in the running website: When will the maintenance take place at what time and what date to avoid minimal customer impact. Information provision providing the customer with website maintenance information and non usable timescale. How many FTE's required from operations for UAT of a particular code so that manpower planning is maintained and BAU is not effected. After the above the estimation of the project starts: Estimating the cost involved in this implementation FTE requirements Methodology used for development. Resources and technical knowhow required. Once the above function is performed the details of which is framed in a document template and sent to the higher management for approval. Once the approval comes the development begins. Tracking and estimation support is given at steps where it is required. After the implementation the UAT is again performed and asked for further requirements or if the management is happy with the implementation then the GO LIVE is arranged and executed. Infosys Process Executive • Infosys PVT LTD: National Australian Bank Project (Australian, Tasmania and New Zealand) • Credit assessment executive for credit cards: * Setting up credit memo for approval in SAP. * Credit appraisal or credit assessment: • Preparation of financial data. • Probability of default calculations. • Credit risk ratio analysis. • Proposal preparation. • Assessment of proposal. • Sanction/approval of proposal by appropriate sanctioning authority. • Documentations, agreements, mortgages. • Disbursement of loan Post sanctions activities such as receiving stock statements. • Review of accounts, renewal of accounts, etc (On regular basis) if CDD is required by the client. • Credit Reporting and Analysis: * Weekly monthly and quarterly report generation regarding performing and non performing portfolios. • Solution design for non performing portfolios: • Setting up project documents and requirements gathering from offshore branch officials to understand the barriers and implementations expected from the project. • Casual meetings and client calls to understand the requirement and setting up targets or volumes of expected production. • Once the requirements have been gathered a project plan is formed and the initiation is given for approval. • Once the initiation have been approved a root cause analysis is performed to understand the current standings using tools like: * 5 why's * Brainstorming * Decision matrix * Pareto diagram • Once the root cause is identified then as per the business need an elicitation of the business problem is defined and communicated. • Project requirements and implementation: * Communicating the current standing of the portfolio to the team and communicating the requirements. * Documenting the current standing of the portfolio: • Historical credit loss report. • Pipeline reporting. • Collections dashboard. * Once the communication is done the implementations in

he projects starts: • We have understood using the root cause as to why the Credit Card is running at daily loss • We have understood using the data gathering what is the current standing of the credit card portfolio. ◦ Using the above two determining what changes to be made in the process of collections. ◦ What recovery solutions can be provided to pool in the bad debts in the portfolio. ◦ Sitting with the sales team to ask them how to target the base. ◦ Sitting with credit assessment officers to introduce new techniques and models to forecast credit lending capacity of a customer. * Once the implementations is completed we move on to the controlling of the project where we define the improvements and analyse: • Present and Past performance analysis. • Trend Measurement of the portfolio: ◦ Bad Debt percentages. ◦ Loss increase or decrease percentage. • Percentage increase or decrease of the performing ratio using: ◦ Graphs * Vertical * Trending * Hybrid ◦ Pie charts ◦ Scatter plots • Once the control setup has been initiated the process then goes into automation and the credit cycle is completed until new requirements come. WORK EXPERIENCE specialist Technology Process - 2008 to Present Production Support Analyst (Microso

ft Infosys Limited - Hyderabad, Telangana - April 2004 to September 2007 Worked As chemist for Quality control Heterolabs Private Limited, Hyderabad from April 2004 to September 2007. PROJECTS Project Details (#1): Microsoft Finance Solution Delivery Tier 1 Client: Microsoft, India Role: Production Support Analyst (Microsoft India) Organization: Infosys Limited, India Description: MSFNSDT1 (Microsoft Finance Solution Delivery Tier 1) support is a group which gives the frontend support for Microsoft applications used by their FTEs (Full-Time Employees). These employees are generally the higher officials of Microsoft who use various tools to generate their reports on Quarterly basis. This Support team is having 47 applications and divided into 4 clusters i.e. Planning, Finance, MS Sales and Headcount. We, the Tier 1 team are the first point of contact for MS employees who use these tools. Our work is to do the troubleshooting and revert back to them with emails and through calls. ROLES and Responsibilities Gatekeeper and Support Analyst

- Resolving user's issues and reverting back to them with emails and through calls related to 12 applications comes under Planning and Finance clusters (WW Services, Calypso, and Latam)
- Preparation of documents (FAQs, Articles)
- Closed Service Request analysis, finding common issues and document them with suggestions.
- Training new resource, monitor and review their work on daily basis.
- Supporting other clusters as SA, during their pick times.
- Developed complex SQL and PL/SQL scripts as part of development.

Project Details (#2): Project 3- VLIT (Microsoft's Volume Licensing) <https://www.indeed.com/r/Venkateswara-D/18b373e3b03b371f?isid=rex-download&ikw=download-top&co=IN> Client: Microsoft Team Size: 24 Tool: Visual Studio 2010 Ultimate, Technologies: C#, Glider framework, SAP GUI (MSU), SQL Server Operating System: Windows 7, Role: Test Engineer Description: Microsoft's VL programs allow customers to purchase and upgrade software licenses at substantial discounts, provide more flexible payment options, ease license management and software deployment, and are the only way to purchase many Microsoft products. The Laminar Alpha (ECX 1.0/1.1&1.15) release to enable the E2E processes required to launch the VLA in market (i.e. book revenue) and to support (through a combination of automated, semi-automated, and manual processes) the essential elements of the Volume Licensing experience required to sustain a production business launch. The Licensing Operations Centre (LOC) will be a single portal for users in the Regional Operation Centers (User Management- Create and Manage users) to perform tasks that facilitate Volume Licensing (VL) transactions and support. Individuals in the ROCs perform a variety of activities within the end to end VL ecosystem, from Pre-Sales support to Quote-to-Cash transactional operations, and subsequently Post-Sales support of Partners, Customers and Internal Microsoft stakeholders. Responsibilities

- Understanding and analyzing Business Requirement Document (BRD), Functional Specification Document (FSD)
- Involved in creation of Test Scenarios and Test cases for the User.
- Involved in Creation of unit test cases.
- Executing the test cases both manual and automated.
- Involved in Data Base testing using SQL queries.
- Reporting bugs using VSTF.
- Involved in functional testing of the VLIT Laminar Web Application.
- Involved in creation of Accounts (Legal, Customer and Partner) and Contacts from SAP GUI for functional testing

Project Details (#3): Microsoft Order Management Client: Microsoft, India Role: Production Support Analyst (Microsoft India, Hyderabad) Organization: Infosys Limited, India Team Size: 10 Details of project:- Working as Line 2 Support Analyst for BGOS group of Microsoft Corporation, and providing 24*7 Production support in SQL Server 2008 for LPO division of Microsoft which provides support for operational deployment and support for a variety of internal corporate tools and external facing localization tools throughout Microsoft. LPO (Licensing and pricing operations) support teams in India, Redmond, Dublin and East Asia, The objective of this project is to support Incident, change the release management in the production system and mission critical Microsoft internal application. Order management: - Order management is a platform which is built on .Net technology and is used as main application for order processing of various products manufactured and sold by Microsoft which includes all operating systems, Microsoft Office, XBOX etc. In this application the orders are placed on the websites which flow through various channels of security and validation. These sub channels are also supported by us. We support this Order management application in 3 different environments, production, UAT (testing Environment) and POB (Production on boarding). We are the actual owners or all the 3 environments. Production Support Analyst: Microsoft Order Management Platform/Application Roles and Responsibilities

- Provide 24 * 7 production support for Microsoft Order management
- Updating the patches released.
- DB administration which includes taking database backup, restoring, health checking.
- Taking appropriate actions according to the alert from SQL servers and web servers.
- Checking any connectivity issues. If so, escalating the case to respective teams.
- Taking care of the Reporting Services issues.
- Updating monthly Taxware Data to all production/UAT/POB servers
- Taking care of production databases and various jobs.
- Smoke test of the jobs
- Running the various database updates given by the SE team in all the 3 environments.
- Resolving web application issues.
- Coordinating with business team and implementing their requirements on database.
- Handling the stores and installing new DLL's and web application files like HTML, XML etc at given locations in all 3 environments.
- Updating passwords when there is a password expiry.
- Giving real time support to customers, when they face

ace any OM application related issues.. □ DBA tasks for more than 30 databases □ Monitoring and administration of user access to web application. □ Administrative tasks like permissions; logins for various tools are websites too. □ Monitoring Database Growth. □ Creating Reports using SQL Scripts (Querying the database) Activities involve the below ITIL process □ Incident Management:- Working on the level 2 incidents to make sure that the response times to the users is minimized. Analyse, troubleshoot and provide the work around/resolution to the incidents and resolve the issue within given SLA (Service Level Agreement) □ Change Management: - Working on the RFC's raised by the user. Following up with the user in all the 11 stages with all the approvals of RFC's. Then, testing the change in Dev and acceptance. Finally implementing the change in production. □ Problem Management: - Identifying the frequently failing problem with the prod jobs and reporting and handling the issue as part error handling and correction task. Computer Proficiency Platforms: Win 9x, NT, XP, Vista (x64 & x86), Linux. Languages: SQL, PL/SQL, Unix, SAP Systems; PMO; IBM FileNet Applications: MS-Office Database: MS-Access, working knowledge of SQL Server.
